Responsible Supply Chain (RSC)

CSRware

Demystifying Sustainability Insights

Why You Need CSRware's RSC Software

1. Mitigation - enhance supplier transparency to reduced supply chain disruption risk
2. Selection - drive supplier selection excellence using Governance, Risk and Compliance / Environmental, Social and Governance (ESG) criteria into RFI, RFQ & RFP process
3. Risk - identify suppliers who don't meet compliance - filter by low, medium and high risk ratings
4. Deliver - a power collaboration tool with your suppliers to drive corrective actions

Who We Are

CSRware® is a cloud-based software platform that provides a suite of **C**orporate **S**ocial **R**esponsibility soft**ware** products powering business to meet a higher standard of accountability and transparency solving society's most challenging environmental, social and governance challenges. With CSRware, you can generate immediate insights into sustainability performance, risk mitigation, being audit ready, and business continuity by collecting, analyzing and making information digestible for the entire value chain to succeed.

How We Extend NetSuite

With the CSRware RSC SuiteApp integration, NetSuite customers can auto-populate supplier data between NetSuite and CSRware then view results within the NetSuite Supplier Network Portal simplifying information required for our customer to report to their business partners to win RFP's, generate brand loyalty and offering products with confidence their suppliers are in compliance with governance, risk and compliance (GRC) and environmental, social and governance (ESG) standards.

Features

- Vendor risk management tracking
- Classify as low, medium or high risk
- Integrate into RFI, RFP process
- Dashboard analytics - flag & report
- Track responses, modify email escalations
- Identify & mitigate risk using risk assessments
- Generate reports to review responses
- Drive corrective actions avoiding future risk

Benefits

1. Risk Mitigation - supplier disclosure to reduce risk (child labor, human trafficking, including supply chain disruption, noncompliance, and brand protection
2. Compliance - ensuring compliance and supplier auditing is active and visible
3. Evaluation - responsible supply chain using analytics and supplier transparency and accountability

Our Solution

CSRware® provides software to manage a resilient Responsible Supply Chain (RSC) using Governance Risk & Compliance (GRC) / Environmental, Social and Governance (ESG) principles to address vendor risk management. RSC provides insights & transparency into risk mitigation and brand protection. The RSC software uses powerful questionnaire assessment capabilities to conduct vendor engagement by collecting information gathered on risk or compliance. RSC invokes accountability into Corporate Social Responsibility related to supply chain activities.

NetSuite and CSRware streamline supplier accountability and transparency to address vendor risk management
