COMPETITIVE BENCHMARKING

Improving and optimizing your social media starts with understanding your performance relative to your competitors and your industry. We define industry-standard metrics and provide you with deep insights that help you benchmark yourself against your competitors in performance, best practices, and audience loyalty.

We place our audience data at the center of our social media metrics so we can provide you with deep insights into your audience such as psychographics, demographics, cross platform behaviors and

de-duplicated counts.

AUDIENCE

**ENGAGEMENT** 

**INSIGHTS** 

We use big data to help marketers see exactly where to spend their time and money to maximize the reach and effectiveness of their content marketing.

## **ACTIONABLE BEST PRACTICES**

At Shareablee, we have developed proprietary technology that unpacks content best practices so we're not just telling you how you performed, we're also shedding light on why your brand performed the way it did (and what your competitors know, that you don't). In this way, you gain valuable intelligence about what steps you need to take in order to continue improving results.

Want to know how your brand stacks up against the competition? Please contact us today at info@shareablee.com or visit shareablee.com
