**FOR IMMEDIATE RELEASE**

## **BOOJUM GROUP AWARDED INDUSTRIAL HEMP PROCESSOR LICENSE FROM STATE OF UTAH**

[Heber City, Utah, Dec. 12th] We are pleased to announce that Boojum Group has received its industrial hemp processor license from the Utah Department of Agriculture.

Founded in 2018 by Dashiell Kulander and Britni King in beautiful Heber City, Utah, Boojum Group is a privately funded, locally owned and operated company that will function as a state-licensed B2B hemp-processing facility.

We plan to work with top cultivation companies and hemp farmers from within the state of Utah, processing locally-grown biomaterial and refining it into highly purified CBD concentrates and distillates via our ethanol distillation process.

Our mission is to nurture the budding hemp industry in Utah by offering these necessary processing services to local cultivators, allowing us to deliver hemp-derived products of exceptional quality to product manufacturers and CBD businesses. We believe in the incredible healing potential of hemp and endeavor to increase the public's access to it as we build lasting relationships within the industry, the surrounding community, and beyond.
