STONE MASTER GLOBAL

For 25 years, Stone Master Global® has offered a variety of manufactured stone veneer and thin brick products for interior and exterior residential and commercial projects. Inspired by natural and industrial elements, our products come in a range of color and texture options that enhance the look and feel of any space.

SUPREME

FROM IMAGINATION TO REALITY

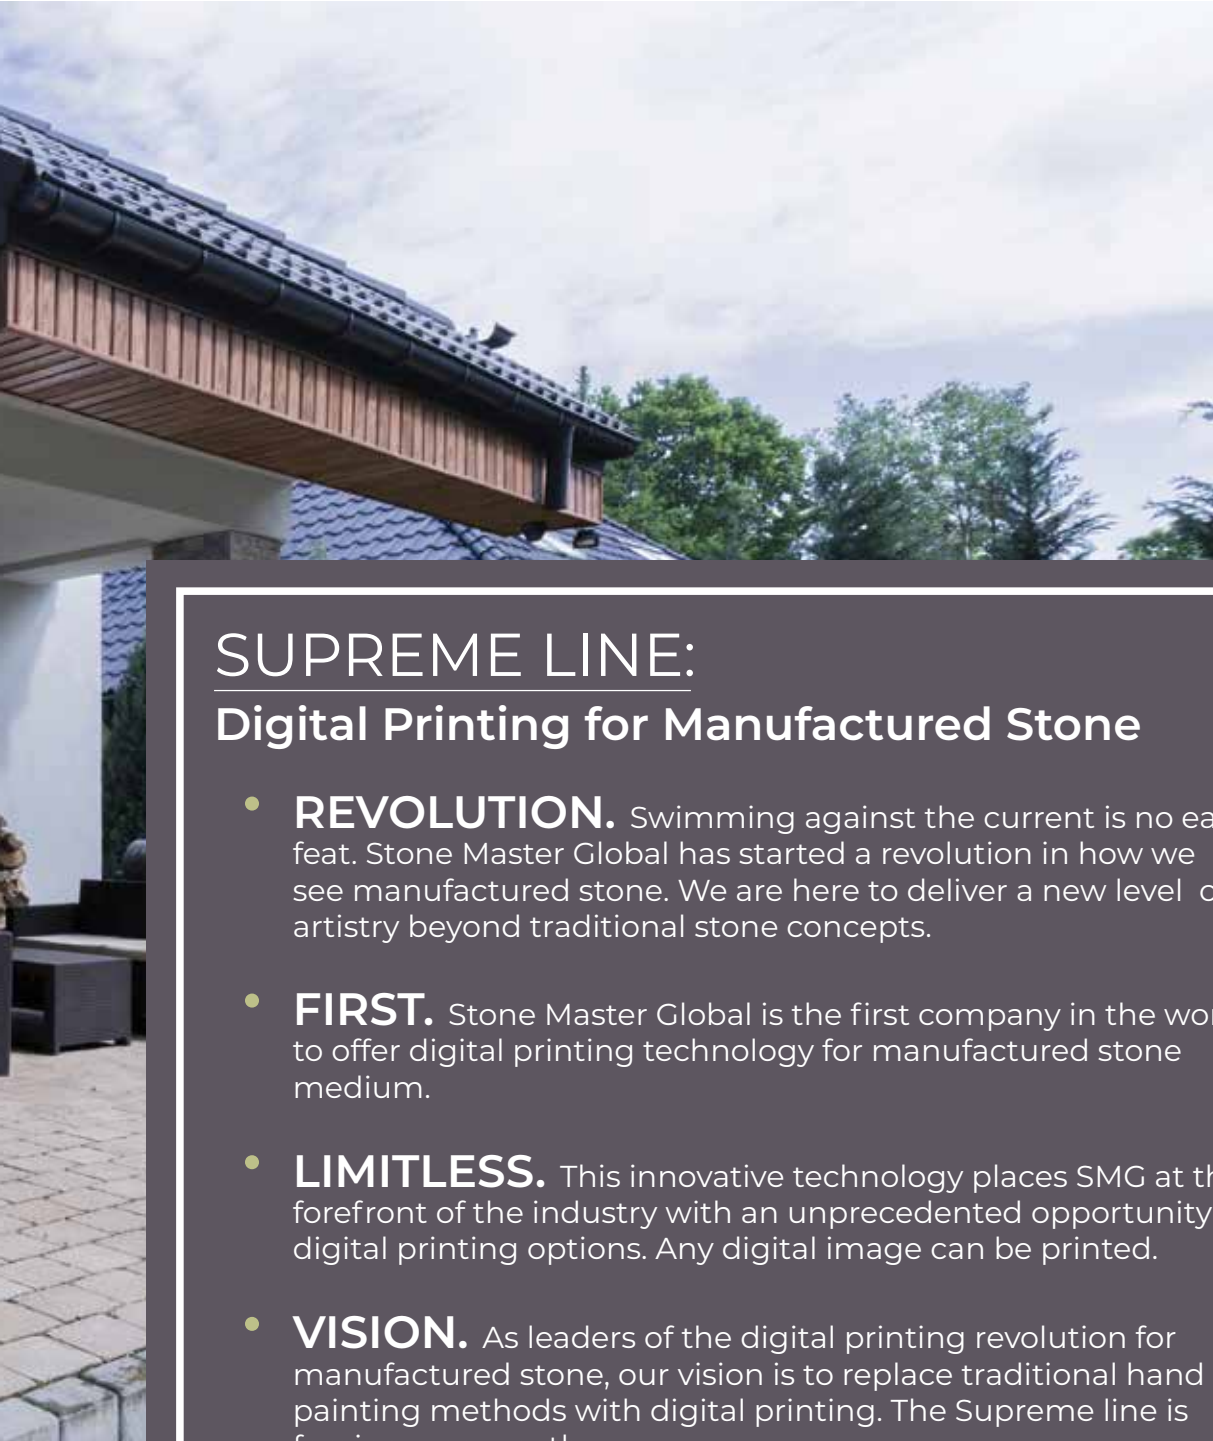

The leading manufacturer of decorative and façade stone, Stone Master Global, has now applied digital printing technology in the production of stone. It is the only company in the world that has developed and implemented this pioneering solution on such a large scale.

The Supreme Line completely opens up new arrangement possibilities, tailored to the preferences, style and character of the user.

Please contact us to learn more about how Stone Master Global can make your designs a reality with our custom ordering option.

SUPREME LINE:

Digital Printing for Manufactured Stone

- **REVOLUTION.** Swimming against the current is no easy feat. Stone Master Global has started a revolution in how we see manufactured stone. We are here to deliver a new level of artistry beyond traditional stone concepts.
- **FIRST.** Stone Master Global is the first company in the world to offer digital printing technology for manufactured stone medium.
- **LIMITLESS.** This innovative technology places SMG at the forefront of the industry with an unprecedented opportunity in digital printing options. Any digital image can be printed.
- **VISION.** As leaders of the digital printing revolution for manufactured stone, our vision is to replace traditional hand painting methods with digital printing. The Supreme line is forging a new path.

FAQ

- **What is the installation process for this product line?**
We offer surface preparation and adhesion product line to assist in ease of installation. However, a surface prep with cement or tile adhesive is appropriate. This product line comes with sealing process completed and therefore is not necessary after installation.
- **What is the maintenance of digitally printed stone?**
The surface can be cleaned with water and gentle detergent soap if needed.
- **Is the surface stain resistant to substances such as coffee or wine?**
Yes. The product has a high quality sealant applied to create a protective layer on both cementitious and plaster products.
- **Can these products be installed in moisture prone areas such as kitchens and bathrooms?**
We recommend only cementitious products for areas prone to moisture with appropriate preparation of the installation surface.
- **Is the surface resistant to damage from UV exposure and other conditions created by nature?**
Yes. The sealant used is high quality and guarantees protection from natural conditions such as UV exposure, moisture, moss, plants, etc.
