

## **Epomaker Launches a Cutting-Edge Designed Product - DynaTab 75X at The Beginning of 2024**

*Epomaker is thrilled to announce the release of its latest masterpiece, the DynaTab 75X for Ultimate Productivity and Gaming.*

Combining sleek design with top-notch functionality, the Epomaker DynaTab 75X compact mechanical keyboard is set to redefine the user experience for both professionals and gamers alike.

### **Compact 75% Desk-saving Layout**

The Epomaker DynaTab 75X boasts an array of features that cater to the diverse needs of keyboard enthusiasts. The compact 75% layout strikes a perfect balance between space efficiency and functionality, offering a seamless typing experience without compromising on key functionality. The keyboard is equipped with customizable RGB backlighting, allowing users to personalize their setup and create an immersive gaming or work environment.

### **Gasket Structure with a dot matrix screen constructed by 540 RGB color dot matrix LEDs**

One of the standout features of the DynaTab 75X is that it is a groundbreaking mechanical keyboard that ingeniously incorporates a gasket structure with 540 RGB color dot matrix LEDs. Its dot-matrix screen can simultaneously display every key-press when typing on the keyboard. Compare to traditional tray, top, or bottom mounts, the gasket-mount structure has long been known as the most popular structure in mechanical keyboards for its bouncy typing feeling. The DynaTab 75X is equipped with its hot-swappable key switches, providing users the flexibility to customize their typing experience without the need for soldering. The button beside the dot-matrix screen is functioned as an RGB controller, unlike other mechanical keyboards that require several short-cuts to toggle the RGB. The DynaTab 75X is aiming at saving users from memorizing complicated shortcuts to switch between RGB lighting effects.

### **Multi-device Synchronization**

Navigating through tasks is made more convenient with the inclusion of dedicated arrow keys and a compact layout, making the DynaTab 75X a versatile choice for professionals who require efficient workflows. The keyboard is compatible with Windows, macOS, and Linux operating systems, ensuring a seamless experience across various platforms.

## Ultimate Sound Profile

In the realm of mechanical keyboards, the sound profile plays a pivotal role. Epomaker ensures the DynaTab 75x excels in this aspect by equipping it with PORON Foam and an IXPE switch sheet to absorb the hollow sound and minimize the key stress to make sure the switch's durability. Moreover, the gasket structure with PC positioning plate and Silicon plugs assure a soft and rebound typing feeling. To further enhance stability and the sound profile, the keyboard incorporates a slow-rebound sound absorbing foam as the bottom foam.

Epomaker takes pride in delivering high-quality, durable products, and the DynaTab 75X is no exception. Crafted with precision and attention to detail, this mechanical keyboard is built to withstand rigorous daily use, whether in a professional office setting or an intense gaming session. The DynaTab 75X will be debut at CES Media Day and the CES official Exhibition in the following days. Epomaker has prepared to meet the professionals around the world to test out their keyboard at the booth. Also, the DynaTab 75X will be kicked off at Kickstarter. Make sure to follow Epomaker's website and stay tuned.

## About us

Epomaker is short for Epoch of Makers. We are committed to providing feature-packed keyboards with affordable pricing that ships worldwide. Our goals for our keyboards are three things: customizability, affordability, and high standards. We are a team composed of gamers, software engineers, product designers, and mechanical keyboard enthusiasts. We were inspired to create our own line of keyboards to share with the world. We wanted to make mechanical keyboards accessible to everyone. Our company is heavily dedicated towards our community-without their feedback and suggestions, this keyboard would have not been a reality.
