

4000W 3-Stage Light Mast on 14' Single Axle Trailer - 220V, (4) 1000W MH - 30' Mast - Red - 50' Cord

Part #: LM-30-3S-TLR14-4X1000W-MH-220V-MOD1

**Made in the USA**

The Larson Electronics LM-30-3S-TLR14-4X1000W-MH-220V-MOD1 4000 watt trailer mounted fold over 3-stage light mast provides a safe and effective way for operators to quickly deploy the equipped metal halide light fixtures to elevations up to thirty feet. The four 1,000 watt metal halide lamps produce a wide spread of intense white light, allowing this unit to effectively cover large work areas with high quality illumination. This red light tower folds over for easy transportation, features a rotating boom that allows for 360° of rotation, and a removable mast head for storing mounted equipment when not in use. The entire assembly is mounted onto a 14' single axle trailer, allowing operators to transport this fold over boom from location to location.

PLEASE NOTE: ANY FREE SHIPPING OFFERS DO NOT APPLY TO LIGHT MASTS OR LIGHT TOWERS

This telescoping three stage steel light mast from Larson Electronics' is designed to quickly and safely deploy 4,000 watts of metal halide lighting in locations where elevated illumination to heights up to 30' is needed for maximum area coverage. This light boom can be extended to 30' above the trailer floor for maximum area coverage, and collapsed to 13.5' for applications where a footprint smaller is required. The red light mast comes with a 50-foot cord and a 30-amp L6-30 cord cap.

The red tower is constructed of square steel tubing with a lower section 12' in length and 4" by 4" by 1/8" thick, middle section 9.5' in length and 3" by 3" by 1/8" thick, and an upper section 8.5' in length and 2" by 2" by 1/8" thick. Each section has 1' foot of overlap. The mast is elevated using an included 1,000lb rated hand winch with 3/16" galvanized steel cable and extended to its full height using a second 1,000 lbs winch.

A 44" wide and 2" by 2" by 1/4" thick mounting plate is attached to the upper section of the mast which provides a strong and stable platform for the four metal halide fixtures, which operate on 220V. When elevated to its full upright position, the mast can be rotated a full 360°. By loosening the T-Handle, operators can rotate the mast with ease in either direction. The mast can be positioned in one of four different positions, and locked back in place by re-tightening the T-handle. The mast itself spins freely with ease, and can typically be rotated with a single hand.

The LM series of towers are powder coated with glossy blue finish for corrosion resistances and aesthetics (this model is red). This light mast is mounted to a 14' by 6', single axle trailer via six 1/2" anchor bolts. The two wheel trailer is equipped with 5,4000 lbs axle and leaf springs with 15" trailer tires. The trailer can support and haul an additional 3,500 lbs of equipment. A standard 2" ball coupling, two standard safety chains, and 4-pin flat trailer plug allow for easy hookup and towing.

The LM family of telescoping towers feature a proprietary mast guidance system, which provide increased stability during high winds. Four 1,000 lbs hand crank leveling jacks are used for leveling. The jacks can be leveled by hand crank or attachment provided for power drills. These outriggers can be extended 2' out from the side of the trailer for added stability. When lowered to 13.5', the mast can withstand winds up to 125 mph. Custom builds can be provided for higher wind speed resistance when fully raised.

Retractable outriggers with 1,000 lb manual crank jacks and tail lights.

This light tower assembly weighs approximately 375 lbs, can easily support and lift 150 lbs fixtures. Larson Electronics can custom tailor these units to the customer's requirements with longer sections and larger mounting plates. For example, the LM-40-4S is another model that reaches to a length of 40', with base section 11.25' in length, lower section 11.25' in length, an upper section 11.25' in length, and a top section 11.75' in length. Larson Electronics can custom build these towers to meet your overall and collapsed height requirements.

We also offer a choice of either the manual or electric winches, finishing, and equipped light heads. Winch options include 1,000 lbs hand winches (included standard) or optional electric winches for standard light towers, and heavy duty winches and hoists for high payload units. Powder coating color can be customized (the standard mast is gloss blue). Mast location on the trailer bed can be tongue mounted, front of the trailer bed, or center of the trailer bed. These towers can be fitted with Larson Electronics line of high output light heads, or customize the mast head to meet the mounting requirements for your equipment.

Suggested Applications: Temporary lighting, construction sites, and security camera deployment. We can equip this mast with 1000W HID-22-SL-REM or 1500W HID-22-15M-SL-REM Metal Halide lights or a wide variety of high powered LED lights with comparable power, including the LED10WSA-160, LED10WSA-320, LEDP5W-30, LEDP5W-60, and GAU-HB-160LED.

At Larson Electronics, we do more than meet your lighting needs. We also provide replacement, retrofit, and upgrade parts as well as industrial grade power accessories. Our craftsmen can custom build any lighting system and/or accessories to fit the unique demands of your operation. A commitment to honesty, quality, and dependability has made Larson Electronics a leader in the lighting and electronics business since 1973.
