

BRAILLO ● 600 SR

The Ideal Braille embosser for high-speed Braille production using paper rolls

The Braillo 600 SR is unique, as it uses paper rolls. Using paper rolls helps save money on paper expenses and eliminates the need for a forms burster and its operator. After text is brailled, a built-in paper cutter cuts the paper and releases it to the stacker. When the stacker is full, a sensor stops the machine so the cut and stacked Braille documents can be removed. Embossing at 1,800 pages per hour, the user can run at full production 1 roll/day without having to load paper.

Feature Highlights:
