

Pinpoint Health clients use our CDC-aligned, HIPAA compliant WebApp to screen, route & monitor the ongoing wellness of their entire population. As the Country begins to fully reopen, staff, customers, students and visitors can be screened remotely for symptoms of COVID-19 before they arrive on premises.

Our Automated Wellness Screening Platform provides a simple, cost-effective way to mitigate risk & route resources based on response-dependent data points triggering notifications to Administrators.

Pinpoint Health helps solve many of the most pressing questions & concerns facing us today:

- How do we effectively communicate protocols and easily screen employees on a daily basis?
- When do we decide when it is safe for employees to return to work?
- How do we know who is showing signs and symptoms and how do we direct them to get help immediately?
- How do we digitally document & store screening responses with limited resources?

Features

Instantly Screen Anyone Using Customizable Pathways

Remotely determine who is being affected and branch respondents to proper procedures.

Instantly Track Symptoms & Results in Real-time

At the push of a button know the precise wellness of your entire organization. Trigger automatic alerts for any changes in symptoms.

Route Response-Specific Resources

Reduce administrative burden while systematically distribute internal procedures and protocols, and helping people get the help they need.

HIPAA Compliant Architecture

Our data compute & storage platform meets the requirements to be certified HIPAA compliant with 99.9% guaranteed uptime backed by AWS (Amazon Web Services).

Works on any Phone, Computer or Tablet

There is no download needed. This is a cross-platform WebApp platform so it will display & function the same on any device.
