Lookah Launches New Vape Pens and Hot Knife Device.

Lookah, the award-winning vape and glass innovator, announced two new 510 pen batteries as well as a hot knife electric dab tool.

The cannabis consumption market has skyrocketed over the past few years.

"Cannabis offers multiple ways for people to manage their health and wellness, from chronic pain relief to easing anxiety."

Explains Mr. Mash, Lookah Marketing Manager. "The demand for solutions to these ailments was at an all-time high during the global pandemic. As medical consultation was limited, many turned to cannabis as a cure."

CBD vape cartridges are one of the most popular ways consumers medicate with cannabinoids. Unlike some cannabis products, hemp-derived CBD products are legal in all 50 states.

The prefilled 510 thread carts with CBD oil are vaped in the same manner as ecigs. That familiarity of consumption makes them easy to use.

This method of taking CBD allows the drugs to enter the body swiftly. This resulted in vaping CBD oil being particularly popular with medical patients who want instant relief from their symptoms.

The new Load and Firebee <u>vape pen batteries</u> launched by Lookah are compatible with most 510 thread cartridges. They appeal to novice and veteran vape users alike. As cannabis products become mainstream, customers are looking for entry-level devices that are reliable and easy.

The new vape solutions from Lookah, with one-button control and informative display, are attracting much attention due to their ease of use and affordability.

The devices have 500mAh and 650mAh batteries, respectively, which is enough for multiple days of use for most vape users. The vapes are compact, lightweight, and simple to use on the go. All features which add to their popularity.

The <u>Lookah Sardine hot knife</u> is an electronic dab tool targeted at the concentrate connoisseur end of the market. "For those that dab frequently, the convenience and ease-of-use a hot knife brings is its main attraction." Said Mr. Mash. They are the sort of accessory that, while not essential, are a joy to use and make it easier to handle concentrates.

The Sardine hot knife has a replaceable ceramic tip that the user heats up at the press of a button. The hot tip makes light work of cutting through concentrates, and the wax melts right off it, so there is no mess left behind.

These new Lookah devices are available from the online headshop www.lookah.com. The <u>Lookah Load</u> (retail price \$22.99) is the smallest vape battery offered by Lookah.

The <u>Lookah Firebee</u> vape pen, sold in packs of 15pcs, is suitable for store and wholesale customers.

The Sardine hot knife (retail price \$59.99) makes loading dab pens clean and efficient.

About Lookah

For more than 15 years, <u>Lookah</u> has been producing high-quality glass water pipes, <u>bongs</u>, and <u>dab rigs</u>. It has recently moved into the electronic dab pen and vaporizer market.
