Introduction

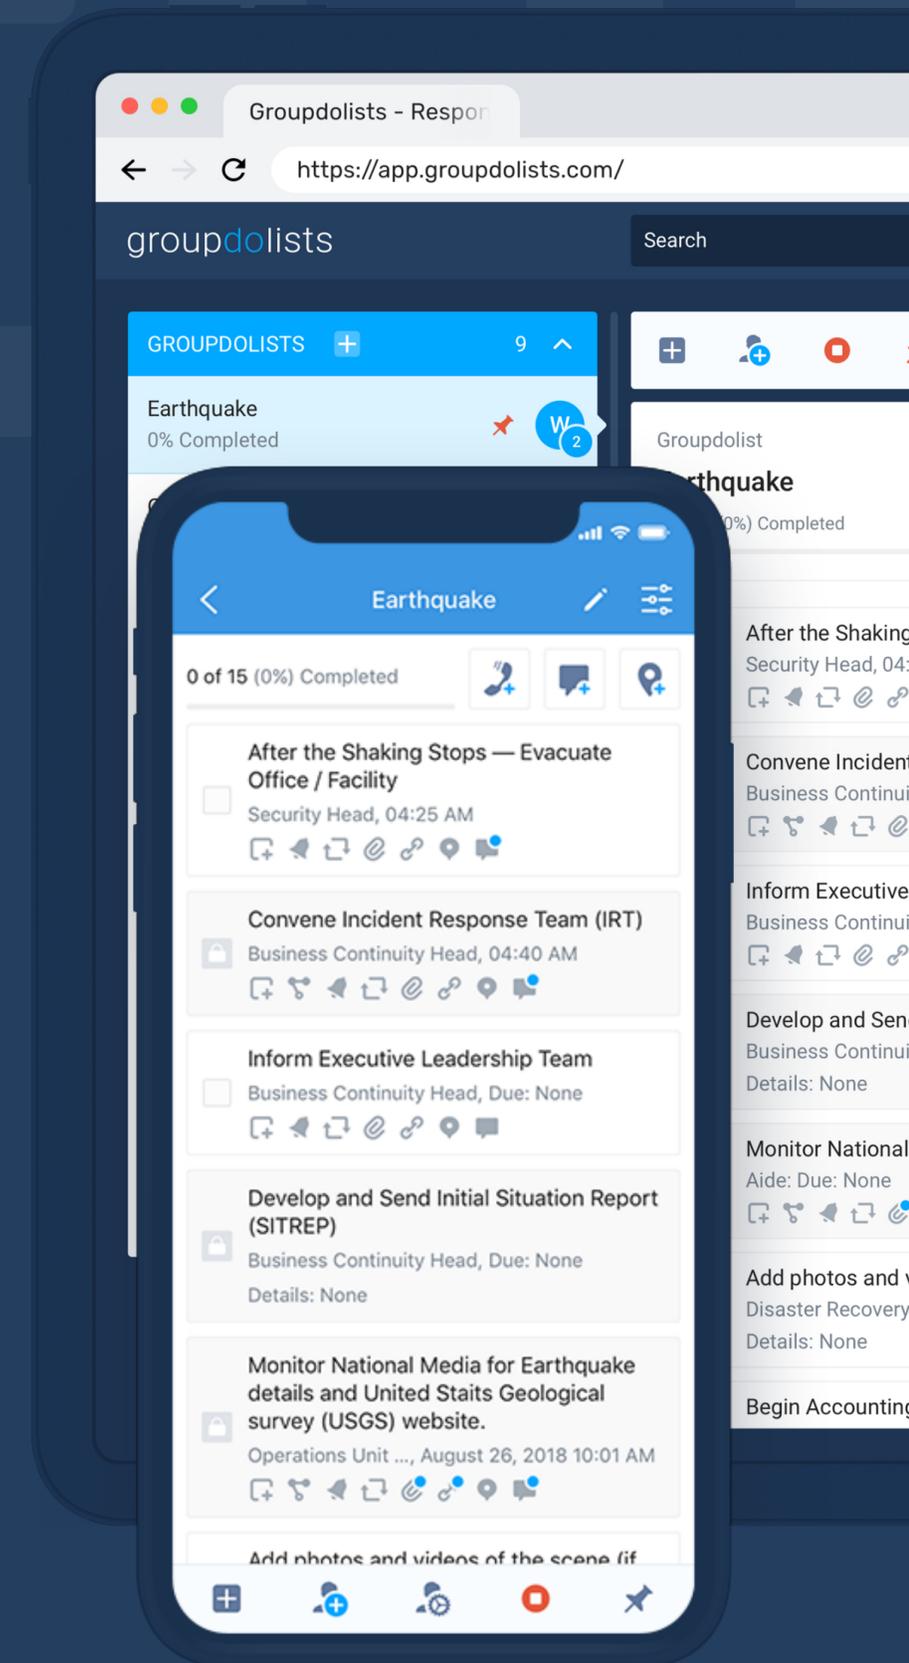

Groupdolists helps organizations coordinate their response teams better and faster during cyber-attacks, natural and man-made disasters, workplace violence, severe weather, network / power outages, data breaches, and more.

Designed to reduce risk, protect the safety and security of your employees, assets, brand and reputation, Groupdolists mobilizes response teams in seconds, sharpening command and control, automatically documenting all activity.

Features

- Centralizes crisis response plans.
- Mobilizes response teams in seconds, not minutes.
- Provides real-time transparency into who is doing what.
- Documents all activity in exportable audit trail, automatically.
- Provides a tap-to-join recordable conference bridge.
- Integrates with leading mass notification solutions.
- Tracks all updates in incident log.
- Includes library of 200+ pre-built plans to copy and customize.
- Eliminates dependencies on existing network infrastructure.

Benefits

- Makes plans actionable.
- Simplifies team training.
- Coordinates teams instantly.
- Tames information overload.
- Eliminates blind spots.
- Captures all activity.
