

AUTOMATION ACCELIRATOR PROGRAM

RPA90X

Accelirate's RPA90X program is the first and only, proven, tried and implemented 90-Day Automation Accelerator Program! RPA90X is designed for either a company new to RPA or to a division within a company that just hasn't had proper exposure to the technology. RPA90x contains a base level of everything you need to get your program started and prevents you from going down a rabbit hole of unexpected cost and unstructured deliverables. RPA90X was built just for these reasons and will get you a Development and Production ready environment, as well as IN PRODUCTION processes that show real man hours returned to the business in the first 90 days.

Accelirate was born from the Enterprise Consulting World and understands the challenges Fortune 1000 companies face in their Automation journeys, starting with Platform Installation, setting Pipeline, and ultimately Development and Testing.

When you are first embarking on your Automation journey, there will be a lot of questions, and a lot of uncertainty. Finding the right information and the right resources to perform a proper pilot program can be overwhelming. Understanding what RPA is, and more importantly, what it isn't, can be a difficult first step. Understanding what sort of cost and resourcing you will need to have short term and long term can have a lot of hidden cost.

The RPA90X Program was designed to get in and get real results through our E^3 Strategy:

EDUCATE

- Educate - RPA Capabilities and Limitations
- Identify Possible Implementation Areas and Low Hanging Fruit
- Select Process for Discovery Session Define Digital Transformation

1-2 Weeks

EVALUATE

- Obtain Details for Selected Process
- Process Installation Verify Technical Approach and Assumptions
- Document Current Cost and Performance
- Measurement Criteria

1-2 Weeks

EXECUTE

- Automate POC Process Present Performance
- Improvement Metrics Plan Broader Implementation
- On Going Support and Maintenance

8-10 Weeks

Too often too much time is spent on the Educate and Evaluate portion, because large consulting companies know this is a ripe ground to try to get into other areas of your business. The end result is months spent evaluating things for a Proof of Concept, and you are left with an expensive document showing you everything you should do but not how to do it. **Accelirate** knows that with the right delivery pod we can deliver real results fast.

RPA90X Delivery Pod

Process Analyst

- Process Definition
- SLA Definition
- Escalation Procedures

RPA Engineer
