31 Go-Lives In 30 Days - GovQA Sets New Record While Onboarding Customers With Essential Software During Critical Time

Woodridge, IL | June 12, 2020 – GovQA's dedicated team of implementation engineers completed onboarding of its cloud-based SaaS solutions for 31 state and local government agencies during the month of May. Each launch includes an in-depth analysis and knowledge-transfer of the agency's unique existing workflows, compliance requirements, and legislative considerations to achieve a configured solution supported by GovQA's 20 years of government expertise.

Agencies onboarded in May include the Washington Department of Health; Washington State Legislature; Cook County (IL) and Orange County (FL) Sheriffs' Offices; the Texas State Bar; Florida Department of Corrections; and the cities of Salem, Waco, and Mesa.

COVID-19 Records Response Solution Offers Accelerated Onboarding

The record number of "go lives" in May demonstrates GovQA's commitment to accelerated onboarding during the global pandemic. In addition to GovQA's Exchange Platform with automated workflows software products that simplifies processing and compliance for public records, subpoenas, complaints, claims, and more; the company is offering a specialized [COVID-19 Records Response System](#). The COVID bundle supports remote work in the cloud and includes four software tools for secure management and reporting of all COVID-related public records requests and legal submissions from citizens, the media, attorneys, external government agencies, as well as internal requests.

GovQA serves large and small governments across the country including 80+ state agencies, 45% of the most populous U.S. counties, and 30% of the most populous U.S. Cities.
