

The sky's the limit for Drone Nerds now that they have **ShipStation** + **SPS Commerce** integration

Drone Nerds employees are 'flying high' thanks to their ShipStation and EDI integration by eBridge Connections

By LAUREN MACDONALD

DroneNerds.com is the largest UAV dealer in the United States. They are also DJI's largest and most experienced authorized service center in the United States.

Being fellow nerds, eBridge was excited to begin working to help the team with a ShipStation integration.

With eBridge integration, DroneNerds' ShipStation shipments are now mapped down from the cloud to on-prem, and then ASNs are being sent automatically to SPS Commerce via FTP.

This eliminates manual work and improves efficiencies.

"We are very happy to see this process up and running," says Jason Barnell from DroneNerds.com.

Good service great products

Good job NERDS, I'll be back!

Colby M.

...but, 'the nerds' needed a way to connect ShipStation data with their SPS Commerce EDI trading partner data.

eBridge Connections was able to set up a workflow that would transfer their shipment data from ShipStation to SPS Commerce in near-real time.

eBridge makes life easier for the folks over at Drone Nerds, saves them time, and ensures no errors in sales processing.

We are very happy to see this process up and running!

- Jason Barnell, Drone Nerds
