## 3 Ways a Beginner Jewelry Collector Can Identify Antique and Estate Jewelry

Visit David Hayman Jewellers next week to explore an extensive array of estate, vintage, and period jewelry from the Madison Estate Collection.

YORBA LINDA, California, October 18, 2019

(Newswire.com) - Learning how to readily identify antique and vintage jewelry takes years and years of dedication and practice, but for the beginner collector, David Hayman Jewellers offers three tips to make the process easier.

Like any other industry, certain jewelry-making trends go in and out of style over the years. The details of an estate piece will point to a specific era; it's all in knowing which ones to look out for. Combining observations from the following questions with a knowledge of jewelry-making history will help boost any collector's identifying skills.

- **What materials and jewelry-making methods are used?** Platinum jewelry, for example, were not made until the Edwardian era; therefore, platinum estate pieces will never be older than that. Fittings and findings also prove helpful in determining the age of a jewelry item.
- **What colors, themes, or design motifs are present?** Because design trends often overlap eras and certain motifs and colors show up again and again, these details should be combined with others to estimate a jewelry piece's age.
- **Are there any hallmarks or maker's marks?** These "signatures" can usually be found on the backs, edges, or findings of an item.

For those who want to try their hand at identifying estate jewelry or simply want to add a new piece to their collection, David Hayman Jewellers will host their semi-annual [Estate Jewelry Sale](#) featuring items from the Madison Estate Collection.
