

Benefits of LED

Today, light can do so much more than brighten our path. It can lighten our impact on the environment. Make our parking lots more secure. Or boost the productivity of our workspaces. Innovative LED lighting solutions can help business owners make a powerful impact on their energy and cost savings.

Economic: Save Money

- Reduce energy costs by up to 80%
- Extended lifecycle of 50,000 hour or more
- Durability and resistant to breakage

Operational: Save Time

- Instant on – switch on at 100% brightness instantly
- Controllability – dimmable to within 0.50% of light output
- Rapid cycling – lifespan is unaffected by switching on and off
- High performance in cold temperatures

Environmental: Impact the Planet

- Illuminate without the toxic mercury found in Fluorescent and CFL
- Emit zero IR or UV radiation
- Reduce CO2 emissions
