

# REWIRE UNLOCKS THE POWER OF ZERO

## WHY BUILD OR RETROFIT BUILDINGS TO BE ZERO ENERGY?

### ECONOMIC

Zero Energy Buildings cost less to maintain and drive greater ROI.

### ENVIRONMENTAL

Zero Energy Buildings provide a reduced carbon footprint.

### ENERGY CODE

Zero Energy buildings exceed increasingly stringent building codes

## BENEFITS OF ZERO ENERGY BUILDINGS

Market demand and energy regulatory goals in building codes are making Zero Energy buildings more common. This shift is supported by tax and other economic incentives that accrue for developers and builders who use Zero Energy designs.

According to the Rocky Mountain Institute (premier energy research organization) the benefits that accrue to zero energy design include:

- 30-50% energy and cost savings
- 13% higher sales price
- 3 to 7% higher occupancy rates
- 3.5 % higher rental rates

### Value of Zero Energy Building Solution
