What We Do

- 🔍 Re-empower individuals by giving them control over their healthcare data
- 🔍 Help enterprises reopen safely by leveraging employee health data
- 🔍 Facilitate a return to life by providing a HIPAA-compliant digital health verification and sharing platform

1

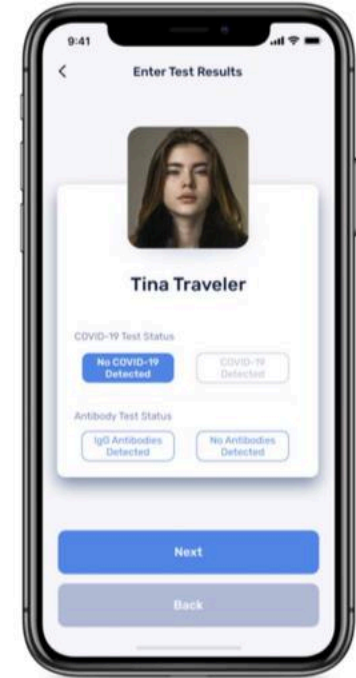

Patient registers and completes ID verification.

2

COVID-19 test results are verified by an authorized healthcare professional and linked to the patient.

* The ID verification of the Patient is performed seamlessly by transmitting the result through a QR scan directly to the app after a biometric identification of the Patient.

3

Test results are uploaded to the database for future patient access and health authority reporting (opt-in).

The information collected is transmitted to the ConfirmD system (with medical data stored within a HIPAA compliant environment). The information is used to determine and display a certified COVID-19 status.

KEY FEATURES OF THE COMPANY

- Validated and Portable Medical Records
- Best-in-class Identity Verification to ensure safety
- Stringent Data Security, HIPAA-compliant

COMPETITIVE ADVANTAGE

- Only COVID Digital Health Platform Verified By Medical Providers
- Secure transmission of medical records via QR Code

WHAT MAKES US DIFFERENT

- Actively deploying across US to facilitate safer reopenings of businesses
- Provides a framework for third-party access controls

WHO WE ARE

+ CEO, Karl Wagner

CIA Vet Karl Wagner has 32 years of worldwide experience delivering success for complex projects and managing risk in emerging markets. A global risk consultant specializing in crisis management and corporate resilience, Karl serves as a Strategic Advisor to several private sector organizations.

Strategic Advisor, Bob Ramsey

A pioneer in the field of emergency medical services, Bob Ramsey is known as 'the father of the modern ambulance service.' A healthcare innovator, Ramsey has applied new technologies in business logistics to the areas of customer, client and employee needs, while focusing on community responsibilities.

+ CMO/CSO, Ramsey Kilani

A seasoned physician-executive and entrepreneur, Dr. Kilani has been a founder, executive, or board member in numerous healthcare and technology startups, and is the founder of the Gliavent Group, a healthcare consulting firm. He is a board-certified physician, and previously served as a faculty member in Neuroradiology at Duke.

COO, Alexandre Chatel

Alexandre Chatel served as SVP Business Development of the US-based investment fund CDIC. He was part of the leaders of the Desertec Foundation, an organization pursuing a global plan to harness solar power from desert regions.
