Coffman Engineers Opens Office in Dallas, Texas

Office opens in response to client demand for engineering services

DALLAS, Texas, August 31, 2021 -- Coffman Engineers, Inc. (Coffman), a multidiscipline engineering firm, announced the opening of its Dallas, Texas office at 8951 Cypress Waters Boulevard, Suite 160. The new location allows the firm to better support clients in the industrial, oil & gas, healthcare, federal/military, housing, hospitality, and energy markets.

The Dallas office is Coffman's first in Texas, although the firm has been working on projects in the state for more than 20 years. The office is managed by Eric Apolenis, PE, Vice President of the Southeast Region and supported by Latrice Celio, PE, a senior electrical engineer and local Texan.

"Coffman has been fortunate to support clients in Texas for many years, so it was a natural next step in our expansion to open our doors in Dallas. We are especially fortunate to have Latrice at the helm with her engineering experience and Texas roots," said Apolenis.

Opening in Dallas has long been a strategic goal for Coffman, especially with the firm's robust experience and capabilities in the industrial, oil & gas, and military markets. In addition, the office location in the Dallas-Fort Worth metroplex allows Coffman to have a central location to clients and is near desirable neighborhoods for employees.

"It is incredibly exciting to be part of Coffman's growth in Dallas. We look forward to strengthening our existing relationships, developing new connections, and getting more involved in our local community," said Celio.

The Dallas office offers electrical and fire protection engineering in-house with full multidiscipline engineering capabilities supported by regional offices, including civil, structural, and mechanical engineering.

About Coffman Engineers

Since 1979, Coffman Engineers has added staff and expanded into dozens of service offerings, but the commitment to innovative work and enduring relationships remains unchanged. Coffman offers deep and scalable multidiscipline engineering services including civil, structural, mechanical, electrical, fire protection, and other specialties. Coffman's 600 employees from 19 offices across the U.S. are committed to clients and the team effort it takes to build a better world.
