WE LIVE IN A TOXIC WORLD

The shocking fact is; the air we breathe, the food and water we consume, and even our home environment expose us to harmful toxins. These toxins accumulate in our body and trigger irritating symptoms that can disrupt our ability to function at our best.

Removing these toxins and providing nourishment to our organs is essential to leading a healthy, vibrant life.

WHAT ARE TOXINS?

Toxins are chemicals, pesticides and heavy metals including mercury, arsenic and lead. If the body cannot eliminate these toxins, they are stored in body fat and accumulate overtime.

- Toxins block your body's ability to absorb nutrients
- Toxins negatively impact physical, emotional and mental health contributing to:
 - Unreasonable anger
 - Frustration and anxiety
 - Fatigue and mental exhaustion
 - Fluctuations with moods and unhealthy habits
 - An inability to focus, stay alert, concentrate
 - Digestive disturbances
 - Environmental and food sensitivities

*Mycotoxins are toxic byproducts of mold which are harmful to plants, animals and humans.

HOW DO TOXINS GET INTO MY BODY?

Food

Drinking Water

Silver Amalgam Dental Fillings

Pharmaceutical Drugs

Vaccinations Including Flu Shots

Formaldehyde Resin in New Clothing

Commercial Baby Lotion & Sunscreen

Air Freshener, Cleaning Products

Commercial Laundry Soap

Insecticides

Commercial Bug Repellent

Lawn Fertilizer

WHY IS IT IMPORTANT TO SUPPORT YOUR ORGANS AND REMOVE ENVIRONMENTAL TOXINS?

- We are exposed to more toxins than we can eliminate
- Toxins bioaccumulate in the body
- These toxins impact:
 - Brain & nerve health
 - Liver & adrenal health
 - Gastrointestinal health
 - Overall wellbeing

You can support a vibrant life by safely and effectively removing environmental toxins and nourishing your organ systems with BIORAY® liquid herbal formulas.

WHY ARE BIORAY® PRODUCTS SO EFFECTIVE?

These combination products have each been formulated to nourish and support your organ systems so they can function at their best. Additionally, NDF® (Natural Detox Factors) is included in five of the six BIORAY® Adult Line products to ensure environmental toxins are leaving your body.

WHAT IS NDF?

The doctor-approved key detox ingredient is chlorella. Chlorella is a freshwater green algae ("green food") that has naturally occurring trace amounts of protein, calcium, phosphorus, magnesium, iron, zinc, vitamins A, B1, C, E, and K as well as RNA/DNA.

In order for chlorella to work, it must be broken down into small micrometers, which is smaller than the diameter of a human hair. At this size, the green food wonder binds to toxins, and then safely moves them out of the tissue, which will be excreted through the urine or bowel. This process is called "detox".

Prior to our process of breaking down the yaeyama chlorella into micrometer particles, the cell walls are intact.

Our unique process breaks down the chlorella's cell walls.

At the size you see here, millions of BIORAY® chlorella particles stick to toxins and safely carry them out of body.
