

Case Relay Camera Power System

Power your camera with any 5V external battery pack or AC power source

The Case Relay Camera Power System (CPS) lets you power your camera continually with any USB 5V battery pack or wall power, providing peace of mind knowing you have an uninterrupted power source for your camera.

With Case Relay, you'll never run out of power and never need to stress about forgetting your camera batteries. If you're shooting and get low on battery power, simply swap out external USB battery packs throughout your shoot. Case Relay's internal UPS battery will keep your camera powered while you exchange external batteries. Utilizing a wall outlet or multiple USB battery packs, you could in theory shoot forever with consistent power flowing to your camera through Case Relay.

CASE
RELAY™ 
Infinite Camera Power

How does it work?

Simply insert the Relay Camera Coupler directly into the camera battery port, attach it to the Case Relay CPS and power your camera with any standard 5V USB external battery (commonly known as a portable USB charger) or an AC power source, such as a wall outlet or generator. Because Relay also has its own secondary internal 1200 mAh battery, if your external battery runs low you can easily hot swap the external battery and not lose power to the camera. If you have access to AC wall power you can also use the Relay USB Wall Power Adapter (sold separately) for an infinite power source to the camera.

The Case Relay Camera Power System provides constant, uninterruptable power for your camera and is perfect for time-lapse photography, photo booths, video production, power-hungry LiveView shooting or any long day on the set. Connect Case Relay CPS to a Tether Tools Rock Solid External Battery Pack (10,000 mAh) and you'll be able to shoot considerably longer than you would with your standard camera battery. A 10,000 mAh battery pack provides 3-10 times the power of most camera batteries, depending on the camera. Need more power? Hot swap in another power bank and continue shooting while never losing power to your camera.

Relay Benefits:

- More cost effective than purchasing multiple proprietary camera batteries
- Power sources are non-proprietary. Power your camera with the same 5V battery you use to charge phones or tablets.
- Never need to charge camera batteries again. And never run out power.
- Compatible with most Canon, Nikon, Sony, and Panasonic cameras. A Relay Camera Coupler (sold separately) is required to use Case Relay Camera Power System. Find the compatible version: www.tethertools.com/relay
- Manufacturer camera battery couplers require use of the *included* Relay Adapter Kit.

To order: Please email PO to orders@tethertools.com or call 888.854.6565.

For more information on Tether Tools, please visit www.TetherTools.com

Suggested Uses:

- Case Relay is ideal for time-lapse photography, astro-photography, or any photography that requires extended shooting time such as nature, fashion, landscape, architecture and more.
- Case Relay is ideal for video production as you can swap the External Battery Bank, without having to stop shooting to change camera batteries.
- Use it to power Photoboosts to ensure consistent uptime throughout an event.

Product Specifications:

- Battery: Lithium 1200 mAh 7.4V UPS battery
- Input: DC 5V 2A (Type A USB)
- Output: DC 8V Max 2A

What's in the box?

- One (1) Case Relay CPS
- One (1) Relay Adapter Kit (compatible with most Canon, Nikon, Sony and Panasonic DC Couplers)

Required Accessories

- A Camera Coupler
 - Tether Tools Relay Camera Couplers support many different cameras. Check www.TetherTools.com/relay for compatibility
- A 5V, 2A output power bank **and/or** 2.1A USB wall adapter is required.
 - Tether Tools offers both, but most are compatible.
 - Rock Solid External Battery Pack, 5V, 2.1A output 10,000 mAh (RSBP10)
 - Rock Solid Dual USB 2.4A AC Wall Adapter (RSUWA)

Recommended Accessories:

- [Tether Tools Rock Solid External Battery Pack 10,000 mAh \(RSBP10\)](#)
- [Tether Tools Rock Solid Dual USB Wall Adapter \(RSUWA\)](#)
- [Tether Pro Cable Organization Case](#)
- [Strap Moore](#)
