

Unleash your artistry with hyper-realistic painting tools and groundbreaking technology

December 14th, 2023 – Embark on a digital artistic journey with the new Rebelle 7, an award-winning painting software. Dive into a world of living canvas, where oils, acrylics, watercolors, and diverse tools blend seamlessly, capturing the essence of natural painting media. Advanced features like pigment color mixing, oil thickness control, watercolor diffusion, and NanoPixel technology certainly push the boundaries of realism in digital painting even further.

Designed for illustrators, painters, and concept artists, Rebelle allows everyone to express their creativity to the fullest. Version 7 promises to take the realism of digital painting to the next level while introducing a great package of new features.

Rebelle 7 introduces stunningly realistic **metallic materials**, accompanied by a metallic color palette with an exclusive brush set for painting with gold, silver, emerald, and other colorful and shiny surfaces.

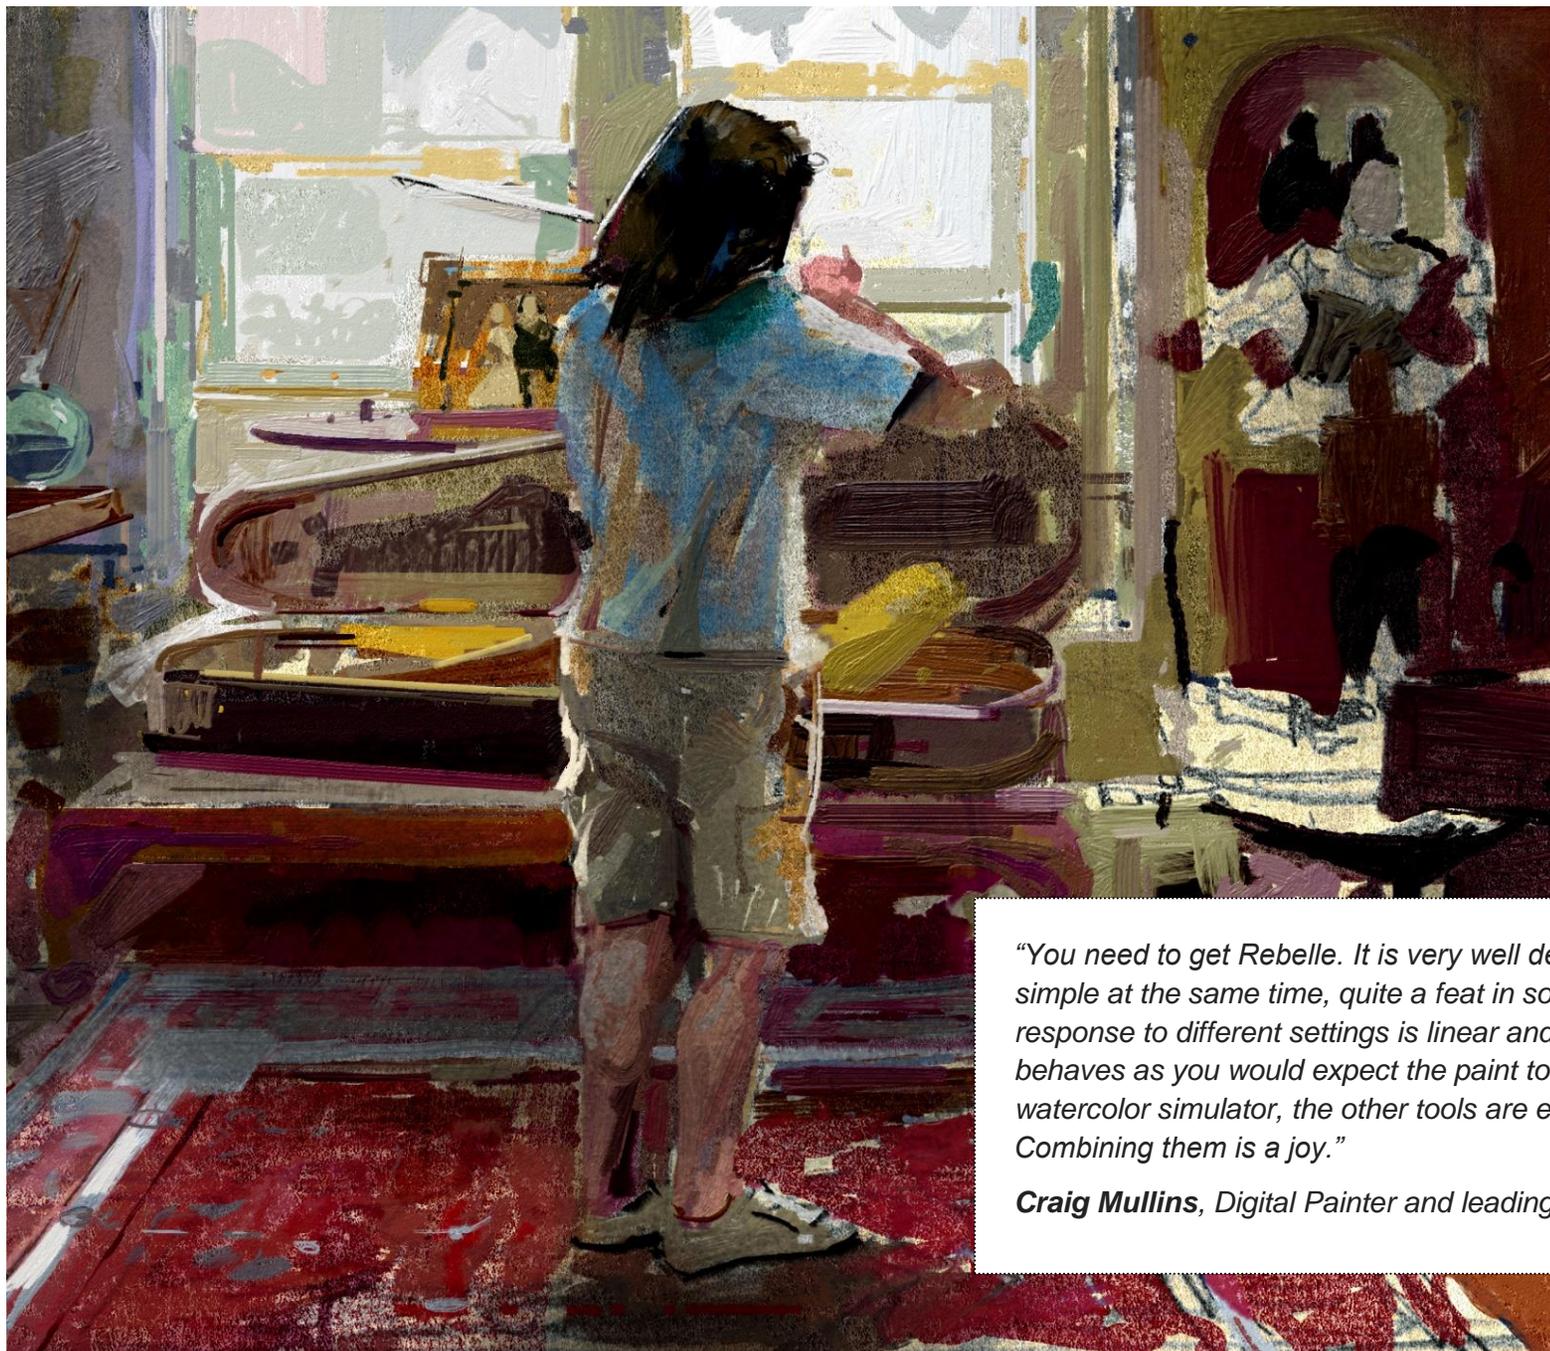

Improved paper and art surfaces bring a more natural drawing and painting experience thanks to raytracing analysis using actual bumps and heights of the paper.

A **variety of amazing structures, patterns, and gradients** adds more in-depth possibilities for experiments with textures and styles under wet or dry paintings.

The introduction of **new filter layers** enables non-destructive color corrections, providing the flexibility to make adjustments to the artwork without directly modifying the original layers.

Version 7 introduces a wealth of creative possibilities with over **250 realistic brushes**. The inclusion of **new grunge and scumbling brushes** enhances the versatility of your creative workflow. Additionally, the **freshly redesigned dry tools** contribute to an authentic traditional painting experience when working with pencils, charcoals, and pastels.

While being compatible with both Windows and macOS, including Apple Silicon M chips devices, we consider Rebelle 7 from Escape Motions the most realistic desktop digital painting software you should put your hands on in 2024.

"You need to get Rebelle. It is very well designed, and powerful but simple at the same time, quite a feat in software design. The response to different settings is linear and predictable and it behaves as you would expect the paint to behave. It is not just a watercolor simulator, the other tools are equally excellent. Combining them is a joy."

Craig Mullins, Digital Painter and leading Concept Artist

New Key Features

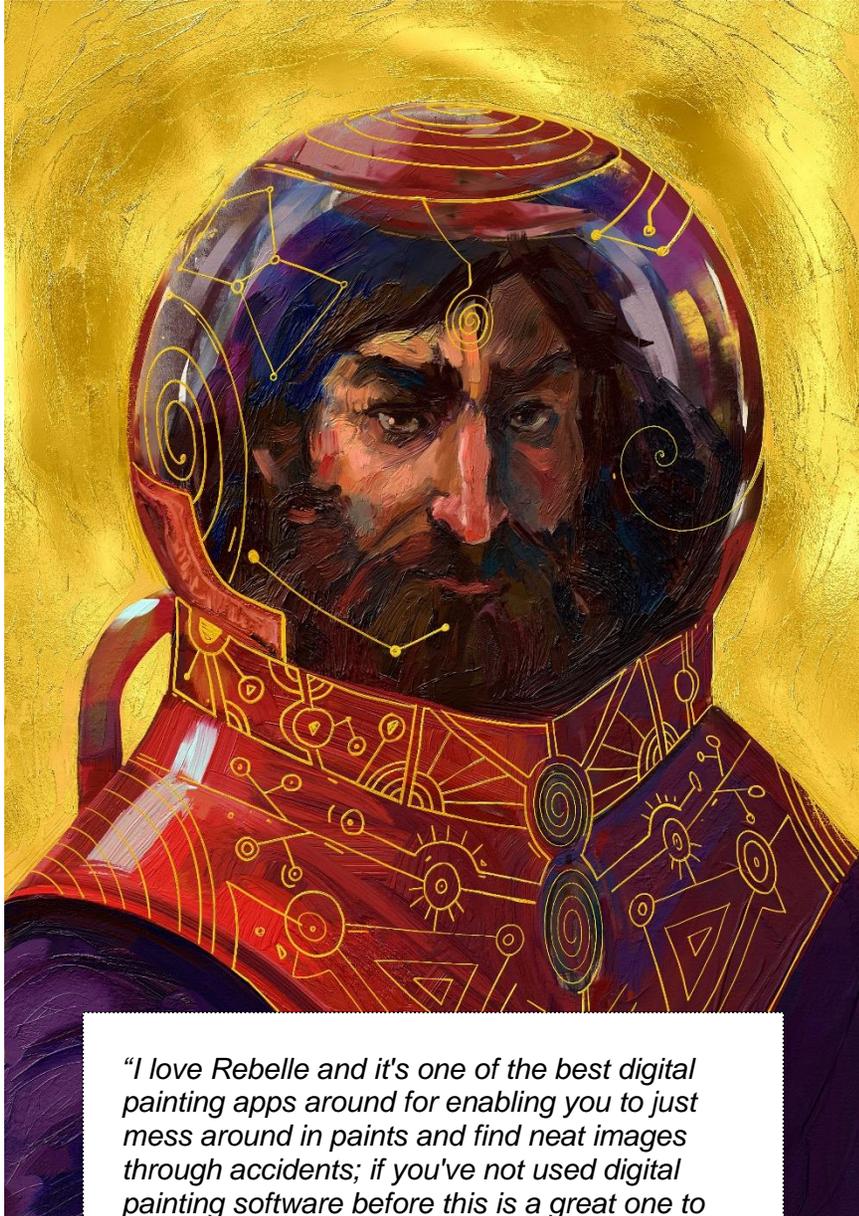

- ✓ Metallic materials
- ✓ Improved paper and art surfaces
- ✓ Authentic brushes
- ✓ Structures
- ✓ Ruler tools
- ✓ Paths
- ✓ Filter layers
- ✓ Patterns and Gradients
- ✓ Updated user interface
- ✓ Color all papers and art surfaces
- ✓ Native Apple M chip compatibility

"Rebelle is an excellent, affordable program replicating traditional painting techniques with absolute authenticity."

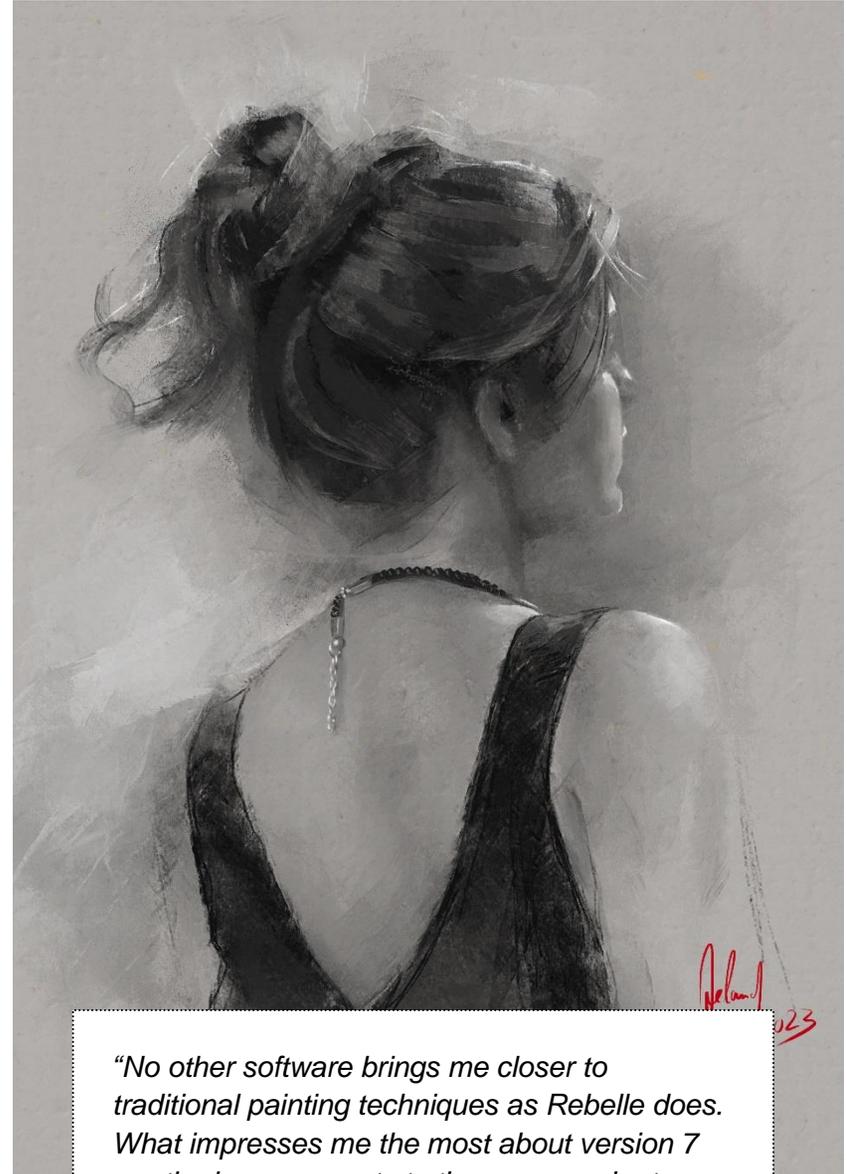

~ ImagineFX Magazine

Artwork by Kamila Stankiewicz

"I love Rebelle and it's one of the best digital painting apps around for enabling you to just mess around in paints and find neat images through accidents; if you've not used digital painting software before this is a great one to start with."

~ Ian Dean, Editor, Digital Arts & 3D at Creativebloq

"No other software brings me closer to traditional painting techniques as Rebelle does. What impresses me the most about version 7 are the improvements to the paper and art surfaces. It gives the natural feeling of painting on paper texture."

~ Georg Ireland, Digital Painter

More Testimonials

“I adore the new Rebelle 7! It is incredibly user-friendly and packed with mind-blowing features that bring my paintings to life in the most realistic way imaginable. The new Metallic brushes are an absolute game-changer, unlocking endless creative possibilities for you to explore!”

~ **Karen Bonaker**, *Digital Painting Educator*

“Rebelle manages to combine ease of use with powerful tools, making for a relaxing and stress-free painting experience. While the new features in Rebelle 7 are all very exciting, for me the most exciting are the gradients, filter layers, and dual brushes.”

~ **Angela Tribbeck**, *Illustrator*

“I am completely blown away by the metallic colors and their new brushes. I can spend hours playing around and pushing the "layer" of metallic paint on the surface and observing the light illuminating the crests of paint strokes. This only could be a motivation to have the new version.”

~ **Janie**, *Digital Painter*

“I love working with Rebelle 7. I am impressed with the brushes overall in every medium, and it's just really fun to use. It's the best software for getting a true, realistic feeling of traditional painting.”

~ **Odessa Sawyer**, *Illustrator*

“Rebelle 7 continues to push the limits of natural media simulation. It is as real as it gets and with no mess to clean up afterward! The new metallic materials look amazing and the new structures feature will give even more opportunity to make rich and interesting surfaces on which to paint.”

~ **Pete Smith (Basement Picasso)**, *Traditional and Digital Artist*

“No other software can duplicate the spontaneous movement and color mixing the way Rebelle does! The same watercolor effects as traditional watercolors with the “Ctrl + Z” digital advantage. This alone makes it a must-have toolbox addition for the professional illustrator.”

~ **Tom Gallovich**, *Photographer and Digital Painting Instructor*

“With Rebelle, you're not just buying the software that brings you the closest to making traditional art in the digital world, you're also buying Escape Motions' tireless commitment to improving it, version after version, update after update. Rebelle 7 offers the most realistic natural materials yet for drawing and painting.”

~ **Rob Salkowitz**, *Painter and Educator*

System Requirements

Minimum:

Intel i5 or equivalent AMD processor, 4 GB RAM, 200 MB hard disk space, a graphics card with 1 GB RAM (OpenGL 3.3 required for Rebelle Pro), Windows 10 (64-bit) or Mac OS X 10.15

Recommended:

Intel i7 (6th gen or newer), equivalent AMD processor, or Apple Silicon (M-series) chip, 16 GB RAM, 1 GB hard disk space, a graphics card with 2 GB RAM: NVIDIA gtx760 for FullHD, NVIDIA gtx1060 for 4K screen, or equivalent graphics card, Windows 10 (64-bit) or Mac OS 11 and newer, Wacom or Windows Ink compatible tablet.

Availability

Rebelle 7 is available for **Windows** and **Mac OS** from **December 14th, 2023** on the Escape Motions website. The new version comes in two editions – **Rebelle 7** for **\$89.99** and **Rebelle 7 Pro** for **\$149.99**.

All editions come with an unconditional 30-day money-back guarantee as well as a 50% upgrade discount for Rebelle 6 users.

"Rebelle has become No. 1 tool in my creative process. I use the software every day and I always find something to improve at as well."

Bryan M. Sanchez, watercolor artist and lecturer

About Escape Motions

Escape Motions is a small studio of creatives and coders dedicated to the development of innovative visual tools. They love to experiment with interactive art, new media, and code to find new expressions and bring new experiences for artists and designers who want to stand out from the crowd. This is why **Rebelle**, **Flame Painter**, **Amberlight**, and **Inspirit** were born.

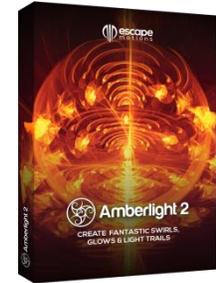

ESCAPE MOTIONS STORY AND VISION

Peter Blaškovič, a talented architect from Slovakia, developed a painting application within his "I am an artist" experimental project in 2009. This became one of the top procedural painting applications in the world. He called it **Flame Painter**. Its unique particle brushes allow artists to create original artworks, light effects, or unconventional designs since then.

The latest version **Flame Painter 4** is the award-winning software offering many advanced features for CG artists and professionals. **Flame Painter for iOS** with its intuitive and playful user interface is specially designed for kids and enthusiast artists.

An equally unique and innovative **Amberlight 2** is the perfect tool for all digital artists who love to experiment with beautiful computer-generated fractal-like images and animations.

A relaxing painting app for creative souls - **Inspirit** soothes the soul and lets you create mesmerizing mandalas and kaleidoscope artworks and watch them slowly evolve in time.

Ever since launching the first version of **Rebelle** in 2015, the team has constantly worked on new features to deliver the closest digital tool that has ever come to the flow, spontaneity, and feel of traditional painting materials. Escape Motions is coming out with a new version 7 of Rebelle.

Peter believes that everyone can be an artist and his vision is to inspire people to be creative. "Many people think they cannot draw or paint at all. Therefore, I want to keep creating tools that encourage and liberate people to express themselves," he says.
