

	HubStor™	DIY Cloud Storage	Cloud Storage Gateways
Policy-based cloud-enablement of existing storage	●	○	○
ACL, data ownership, and folder synchronization	●	○	○
Compression, deduplication, and versioning	●	○	◐
Seamless storage tiering	●	○	○
Directory synchronization, SSO, MFA, RBAC	●	○	◑
No-shared-secret cloud ingestion methodology	●	○	○
Data-aware cloud storage, built-in analytics	●	○	○
Data management policy engine	●	○	◑
Data classification, PII detection, data loss prevention	●	○	○
Litigation hold, discovery search, cases, collection	●	○	◑
WORM compliance, retention management	●	○	◐
Built-in search-as-a-service	●	○	○
Chargeback	●	○	○
Global namespace, global file locking	◐	○	●
Scale-out architecture with federated user experience	●	○	●
Fully managed single tenancy deployment architecture	●	○	○
Zero lock-in, both technically and contractually	●	◐	○
Transparent pricing model	●	●	○
Quick to deploy, easy and low-cost to adopt	●	○	○
