

# Enabling Frontline Workers with Webalo

## Who are Frontline Workers?

They are the heart of an organization, workers who perform operational activities, producing or maintaining products, running daily operations, etc.

### GARTNER PREDICTS

of mobile and endpoint investments will be aimed at enabling frontline workers over the next five years

### ENABLING FRONTLINE WORKERS IS YOUR KEY TO PROFITABILITY

According to a Gallup poll, disengaged employees cost an estimate \$483 billion to \$605 billion in lost productivity each year.

### Webalo helps the frontline workforce make better, more informed decisions

by simplifying and improving their daily activities with real-time access to actionable analytics, through intelligently managed workflows

### Webalo is your foundation for enabling an effective digital transformation initiative

to drive frontline workforce productivity and growth. Overcome the largest barrier to digital transformation --not connected things, but connected people.

### ACCORDING TO FORBES

Organizations that empower frontline workers reap the benefits:

see higher levels of customer satisfaction

see higher levels of job satisfaction among employees

see lower turnover among employees

From Forbes Empowering the Workforce 2017

Without frontline workforce engagement, Digital Transformation initiatives will inevitably fail.

## Webalo Engages the Frontline Workforce

### Why It Matters

Because motivating and empowering the frontline workforce increases revenue, lowers costs, reduces employee turnover and improves customer satisfaction, all at the same time.

Frontline workers see relevant information to accomplish tasks **on the move**

They get precise information in **real-time**

They collaborate through intelligently managed **workflows**

Webalo provides the app generation infrastructure for the digital transformation of frontline workers. Webalo's patented technology enables companies to become **User First**™ organizations, easily transforming their existing enterprise and industrial applications into **real-time, actionable, task-oriented, persona-based applications**, where each user has just the information they need, on their device, to **help them get their job done**.
