

# Building “The Connected Supply Chain”

## MANUFACTURING

MES and LIMS work hand in hand to manage the quality, food safety and genealogy of milk from weighbridge to finished goods on a pallet.

CONSUMER

RECEIVING

PAYROLL

## MILK ACCOUNTING

MM feeds milk tickets into Producer Payroll for farm/hauler payments and plant billing. This load data is then made available for milk intake at the plant.

DATA & BI

BLIMLING  
and ASSOCIATES

## MILK HAULING

MM digitizes the loads real-time, ge-locates movements, improves accuracy and shares data with other systems.

MOBILE MANIFEST

DISPATCH

## MILK LOADS

MDD aggregates farm level data from herd and feed systems. Farms generate milk loads that get picked up and delivered to market.
