PANEL BUILT

Panel Built's steel line fabricates powder-coated structural steel mezzanines and stair systems to your specifications—with custom sizes, heights, spans, decking materials and landings. Convert wasted space into a usable area for your facility.

Mezzanines

Features

- Modular bolt-together systems
- Sturdy handrail with 4" kickplate
- Heavy-duty columns & baseplates
- Heavy-duty prefabricated stairs and accessories
- 4-MIL powder coated steel components provide a superior level of durability against abusive, corrosive applications

Standard Decking Options

- Advantech - This is a high quality product superior to ordinary plywood and OSB options due to its enhanced strength and moisture resistance
- ResinDek - This is high density composite flooring, recommended for mezzanines requiring a solid floor subject to heavy loads from the use of pallet jacks, carts or dollies
- Diamond Plate - This steel decking is considered to be our second most durable flooring
- Concrete Flooring - The most durable type of mezzanine flooring by far is concrete
- Press-locked Grating - This decking is a common choice in the waste management, mining, and food service industries

Applications

- Work Platforms
- Observation Decks
- Storage Decks
- Second Story Offices
- Watch Towers
- Conveyor Systems
