

Proposal to create a
United Nations Office on Strategic Threats

September, 2021

Secretary-General Antonio Guterres
United Nations

Dear Mr. Secretary-General:

Long-range strategic threats to the survival of humanity are well-documented, ranging from the potential of advanced artificial intelligence growing beyond human control to weakening magnetic fields that protect life on Earth.

Although the United Nations includes agencies that are addressing many of the problems facing humanity today, there is no central office to identify, monitor, anticipate, and coordinate research on long-term strategic threats to humanity.

A UN Office on Strategic Threats, which would centralize and coordinate information and prospective studies on a global scale, could serve international agencies, multilateral organizations, nation-states, the private sector, academia, and humanity in general. We think that the Office could be created without putting pressure on the budget of the organization, reallocating resources and coordinating its work with universities and research centers around the world.

This idea was raised and discussed in detail during World Future Day, March 1, 2021, a 24-hour conversation of nearly a thousand experts from 65 countries, organized by several international associations of futurists and think tanks to discuss strategies for improving the global future.

The signatories of this open letter – academics, diplomats, scientists, and experts in foresight and strategy from different countries and sectors – ask Your Excellency to welcome and facilitate the adoption of a UN General Assembly Resolution at this September’s General Assembly that would give the General Secretariat the mandate to conduct a feasibility study on establishing a UN Office on Strategic Threats.

Sincerely,

Attachment: List of Signatories endorsing this recommendation:

Board of Directors

Elizabeth Florescu
Jerome Glenn
Theodore Gordon
Concepción Olavarrieta
Youngsook Park
Charles Perrotet
Ibon Zugasti
