PRODUCT DATA SHEET
# BLUEFORCE MOBILE COMMAND KIT

## Rapidly deployable and fully integrated tactical command kit for mobile incident command & crisis operations in a "carry-on" form factor

It's today's technology built around 15 years of deployed field experience executing counter-terrorism joint task forces.  A kit that provides communications, sensor fusion, and a distributed common operating picture that crosses domains, agencies, and networks.  More importantly, a kit that isn't confined to a single vehicle and can be moved in minutes with a space, weight, and power footprint that is military and civilian transport platform friendly.  It's a "carry-on" kit that is smaller than a suitcase and weighs less than 33 pounds.  It's future proof in that it can interface with and extend today's sensors and services with tomorrow's.  It's the kit that has supported counter-terrorism operations in New York City and Los Angeles, and border trafficking operations in California, Arizona, New Mexico, and Texas.  Not to mention military operations for subterranean and CBRN/WMD missions which included people, unattended sensors, unmanned vehicles, and live streaming video assets.  It's communications, compute, and command, powered by Blueforce.

**HRT/De-escalation**

**Special Events**

**Incident Management**

# Carry-on, airline checkable, mobile command and control kit for emergency operations or business continuity of operations

| | |
|---|---|
| **SPACE** | Parsec "Newfoundland" case measuring 22.8" x 19.6" x 11.7 in |
| **WEIGHT** | ~30lbs/16.6 Kg |
| **POWER** | 120 volt hookup powering all components |
| **COMPUTE** | 11th gen Intel Quad Core i7 with 16GB RAM,  256GB SSD |
| **DISPLAY** | Samsung industrial grade flat screen monitor |
| **COMMS** | Peplink BR1 PRO 5G/LTE w/ Band 71, optimized for T-Mobile for Government |
| **COMMAND** | ONE (1) BlueforceCOMMAND license, and ONE (1) BlueforceEDGE license |
| **MOBILE** | TWELVE (12) BlueforcePA-TROL for Android or iOS for enduser tracking, collaboration, GIS, and accountability |

## Single Pane of Glass
People, sensors, drones, robotics, and AI as a "single pane of glass view" using simple drag and drop methods.

## Information Sharing
Move information fast!  Text and chat securely while sharing GIS, pictures, floor plans, and other collaborative data.

## Autonomous Sensing
Blueforce provides access to autonomous sensors and services enabling access to drones, K9 video, and more.

## Alerting
Distribution of system messages amongst humans, sensors, and autonomous agents, triggered by threshold, location, or rules.

## Accountability
Blueforce command and mobile clients provide end-to-end accountability tools like PAR Check, Roll Call, and Evac.

## Autonomous Services
BlueforceEDGE CLASS1 endpoint enables hyperlocal access to drone video, weather alerts, and autonomous monitoring.

## Field Gateway
Message queued interconnection of sensor networks with access to data from a disparate array of systems and sensors.

## Secure
Blueforce products are rated TRL9 through use in active military ops and leverage NIST FIPS 140-2 certified crypto providers.
