

MANAGED SERVICES TO OPTIMIZE IP OPERATIONS

Helios provides the industry's only specialized managed services focused exclusively on intellectual property. We understand the unique legal and business requirements of patents, trademarks, domains and other corporate intellectual assets. We apply leading business management practices to help IP Departments improve their operations and administration.

Benefits

- Lower operating costs and improve productivity of key support activities
- Achieve predictable budgets for external services
- Align business needs with internal versus external services
- Improve efficiency and effectiveness of internal staff
- Reduce errors and issues caused by poorly managed external service execution
- Achieve greater return on technology and tools

ACHIEVE SUPERIOR IP OPERATIONS PERFORMANCE WITH
HELIOS MANAGED SERVICES

We Provide Comprehensive IP Operations Capabilities

We work with IP groups of all sizes, offering a flexible managed service program that is tailored to each client's specific situation, requirements and objectives. From single point solutions, to comprehensive operations partnerships, we work across the full spectrum of IP operations activities.

- Highly experienced IP operations professionals
- Efficient coordination of administrative services
- Leading practices in IPM processes
- Optimal internal and external staffing
- High impact reporting and analysis
- Effective and useful IPM systems and tools

The Opportunity of Managed Services for IP Operations

IP Departments have become increasingly complex. As the demands of creating and managing a global IP portfolio grow, the pressures for cost controls and higher value are driving organizations to seek new, innovative approaches to legal operations management.

Our managed services model takes a fundamentally different approach as compared to existing specialist services. To learn more about how Helios Intellectual Property can help your organization, please visit our website
