ATLAS FILTRI, A STEERING FORCE BEHIND THE WATER TREATMENT INDUSTRY

WE VALUE WHAT REALLY MATTERS.WATER!

Atlas Filtri is a dynamic and flexible, modern manufacturing company: designing, developing and producing components and systems for water treatment applicable to both domestic and industrial sectors. We are established since 1975 and being in the water filtration industry Atlas Filtri has created a name for itself in the world through constant dedication and attention to detail and innovation of products and materials...as well as the constant enthusiasm that identifies us!

As an Italian company, we are dedicated to engineering and designing our products in true Italian style, each of which is internationally patented. Our products are each uniquely styled to provide simplicity of use, reliability and versatility. We are very proud to declare that all of our products are 100% produced in Italy and so reflect the reputation that the Made in Italy has all over the world.

In fact, the Made in Italy concept is the core value of our way of being.

We are dedicated to following closely all the steps leading to the products realization. Starting from the innovative idea, our technicians design the product and prototype it. The realization of the mold then leads to a fully automatized production process with persistent quality control to ensure the highest-level products with the lowest levels of refuse. It is our responsibility to protect our world by keeping carbon emissions to a minimum and by producing as little waste as possible and our production strategy and material choice does precisely that.

SUCCESS NUMBERS - THE COMPANY

90% of the products
are **for export.**

Presence in more
than **95 countries**
worldwide

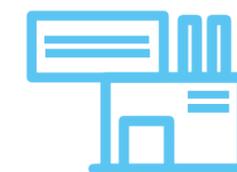

More than **130**
specialized
employees

More than **300**
distribution
partners worldwide

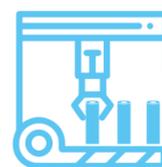

More than **3000**
customers globally

More than **10.000 m²**
for offices, production
and logistics.

SUCCESS NUMBERS - PRODUCTION

22 robots
for cartridges
manufacturing.

Production activities
24 h/day
5 days/week.

**25 injection molding
machines** for producing
filter housings, heads,
bowls and components.

**220 tons of
polypropylene** used
per year.

**500 tons of reinforced
polypropylene** used
per year.

More than **600
tons of PET** used
per year.

FILTER HOUSINGS RANGE

OASIS DP RO
RO units made up with patented and registered DP TRIO filter housings and with RO VESSEL.

OASIS DP SANIC
with antimicrobial technology.

PLUS 3P / PLUS 2P
Housings for cartridge height at 5", 7", 10" and 20".

PLUS 3P SANIC
with antimicrobial technology.

PLUS HOT 3P
for hot water.

DEPURAL TOP
for counter-top use.

DOSAFOS PLUS
Non proportional dosing system.

DOSAPLUS
Proportional dosing system with polyphosphate.

MIGNON 3P / MIGNON 2P
Single and Duplex housings with reduced dimensions.

DEPURAL
Mobile filter housings for counter-top use.

HYDROPUL
Self-Cleaning filters.

FDM 1P
Sludge filter.

PP 3P
applicable for water with non-neutral pH and for other liquids.

HYDRA RAINMASTER
Designed for the filtration and treatment of rainwater.

DP
DP is a full range of housings for cartridge height at 5", 7", 10" and 20".

HYDRA DS
Self-cleaning filters with 360° rotational connection group.

DP BIG F
filter housings with metal frame kit.

K DP
Designed to withstand working pressure up to 10 bar.

DP SANIC
with antimicrobial technology.

HYDRA
Self-cleaning filters with innovative solutions for the self-cleaning operation.

DP BIG SANIC
with antimicrobial technology.

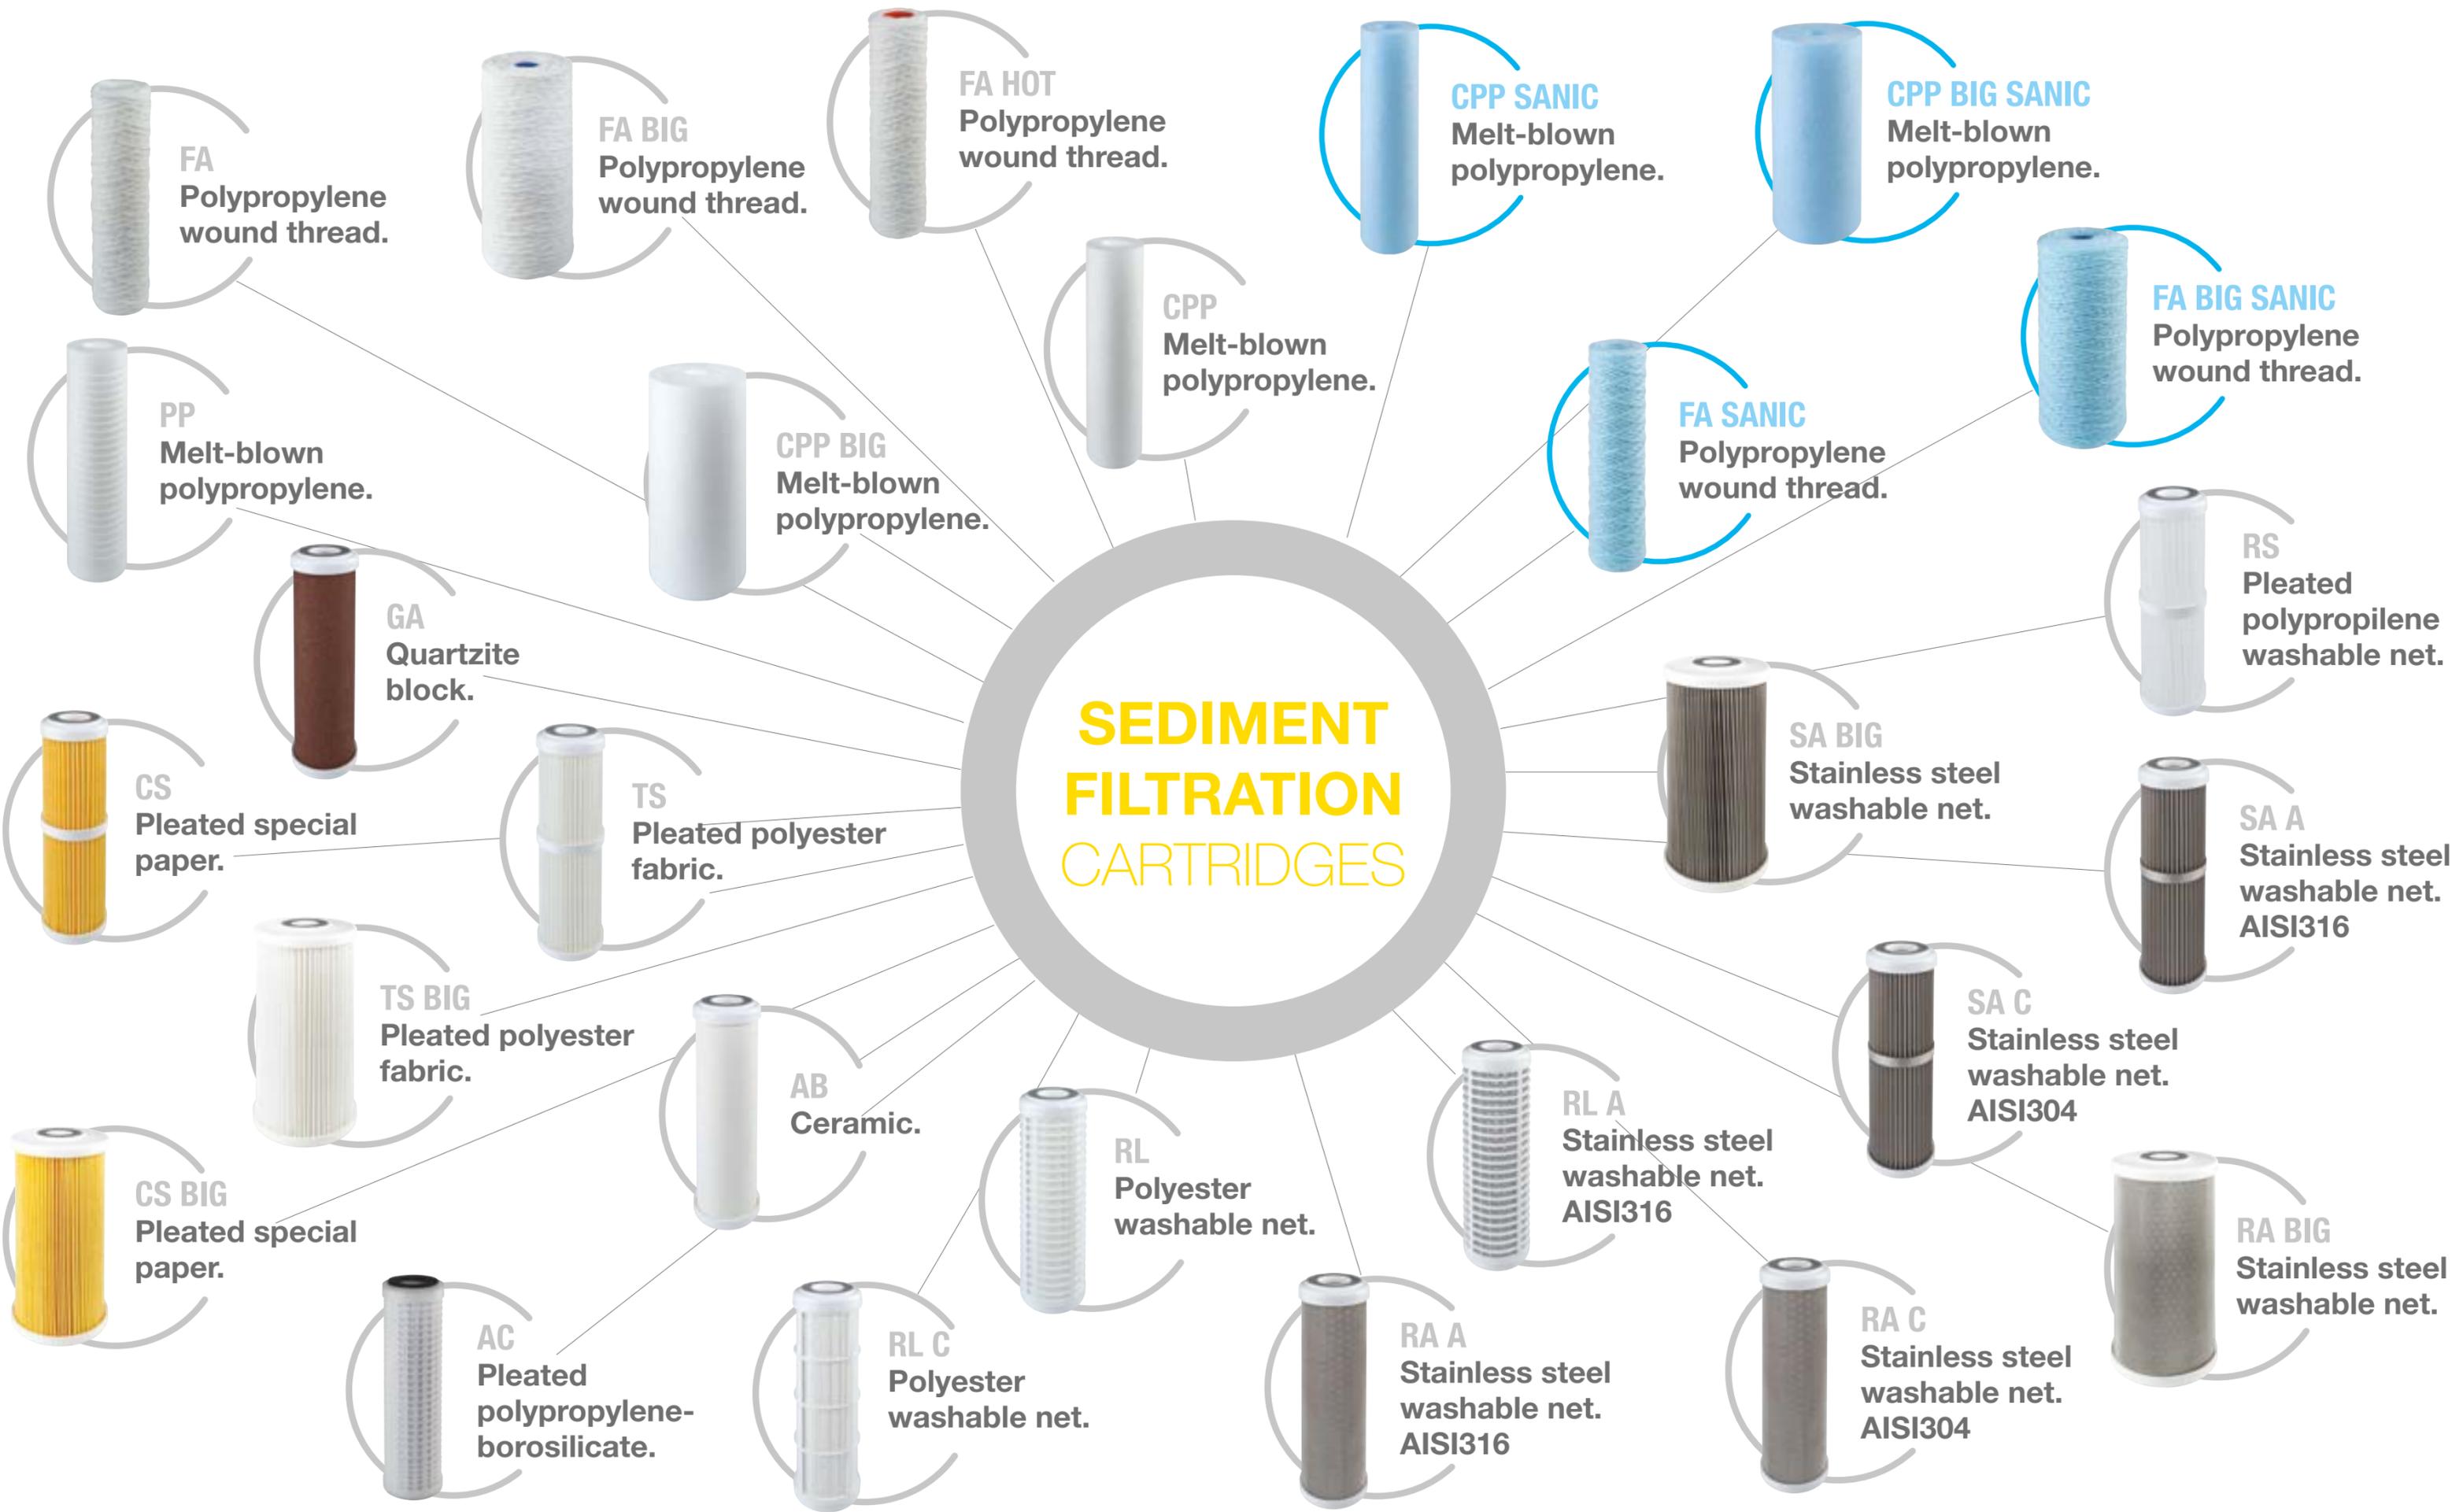

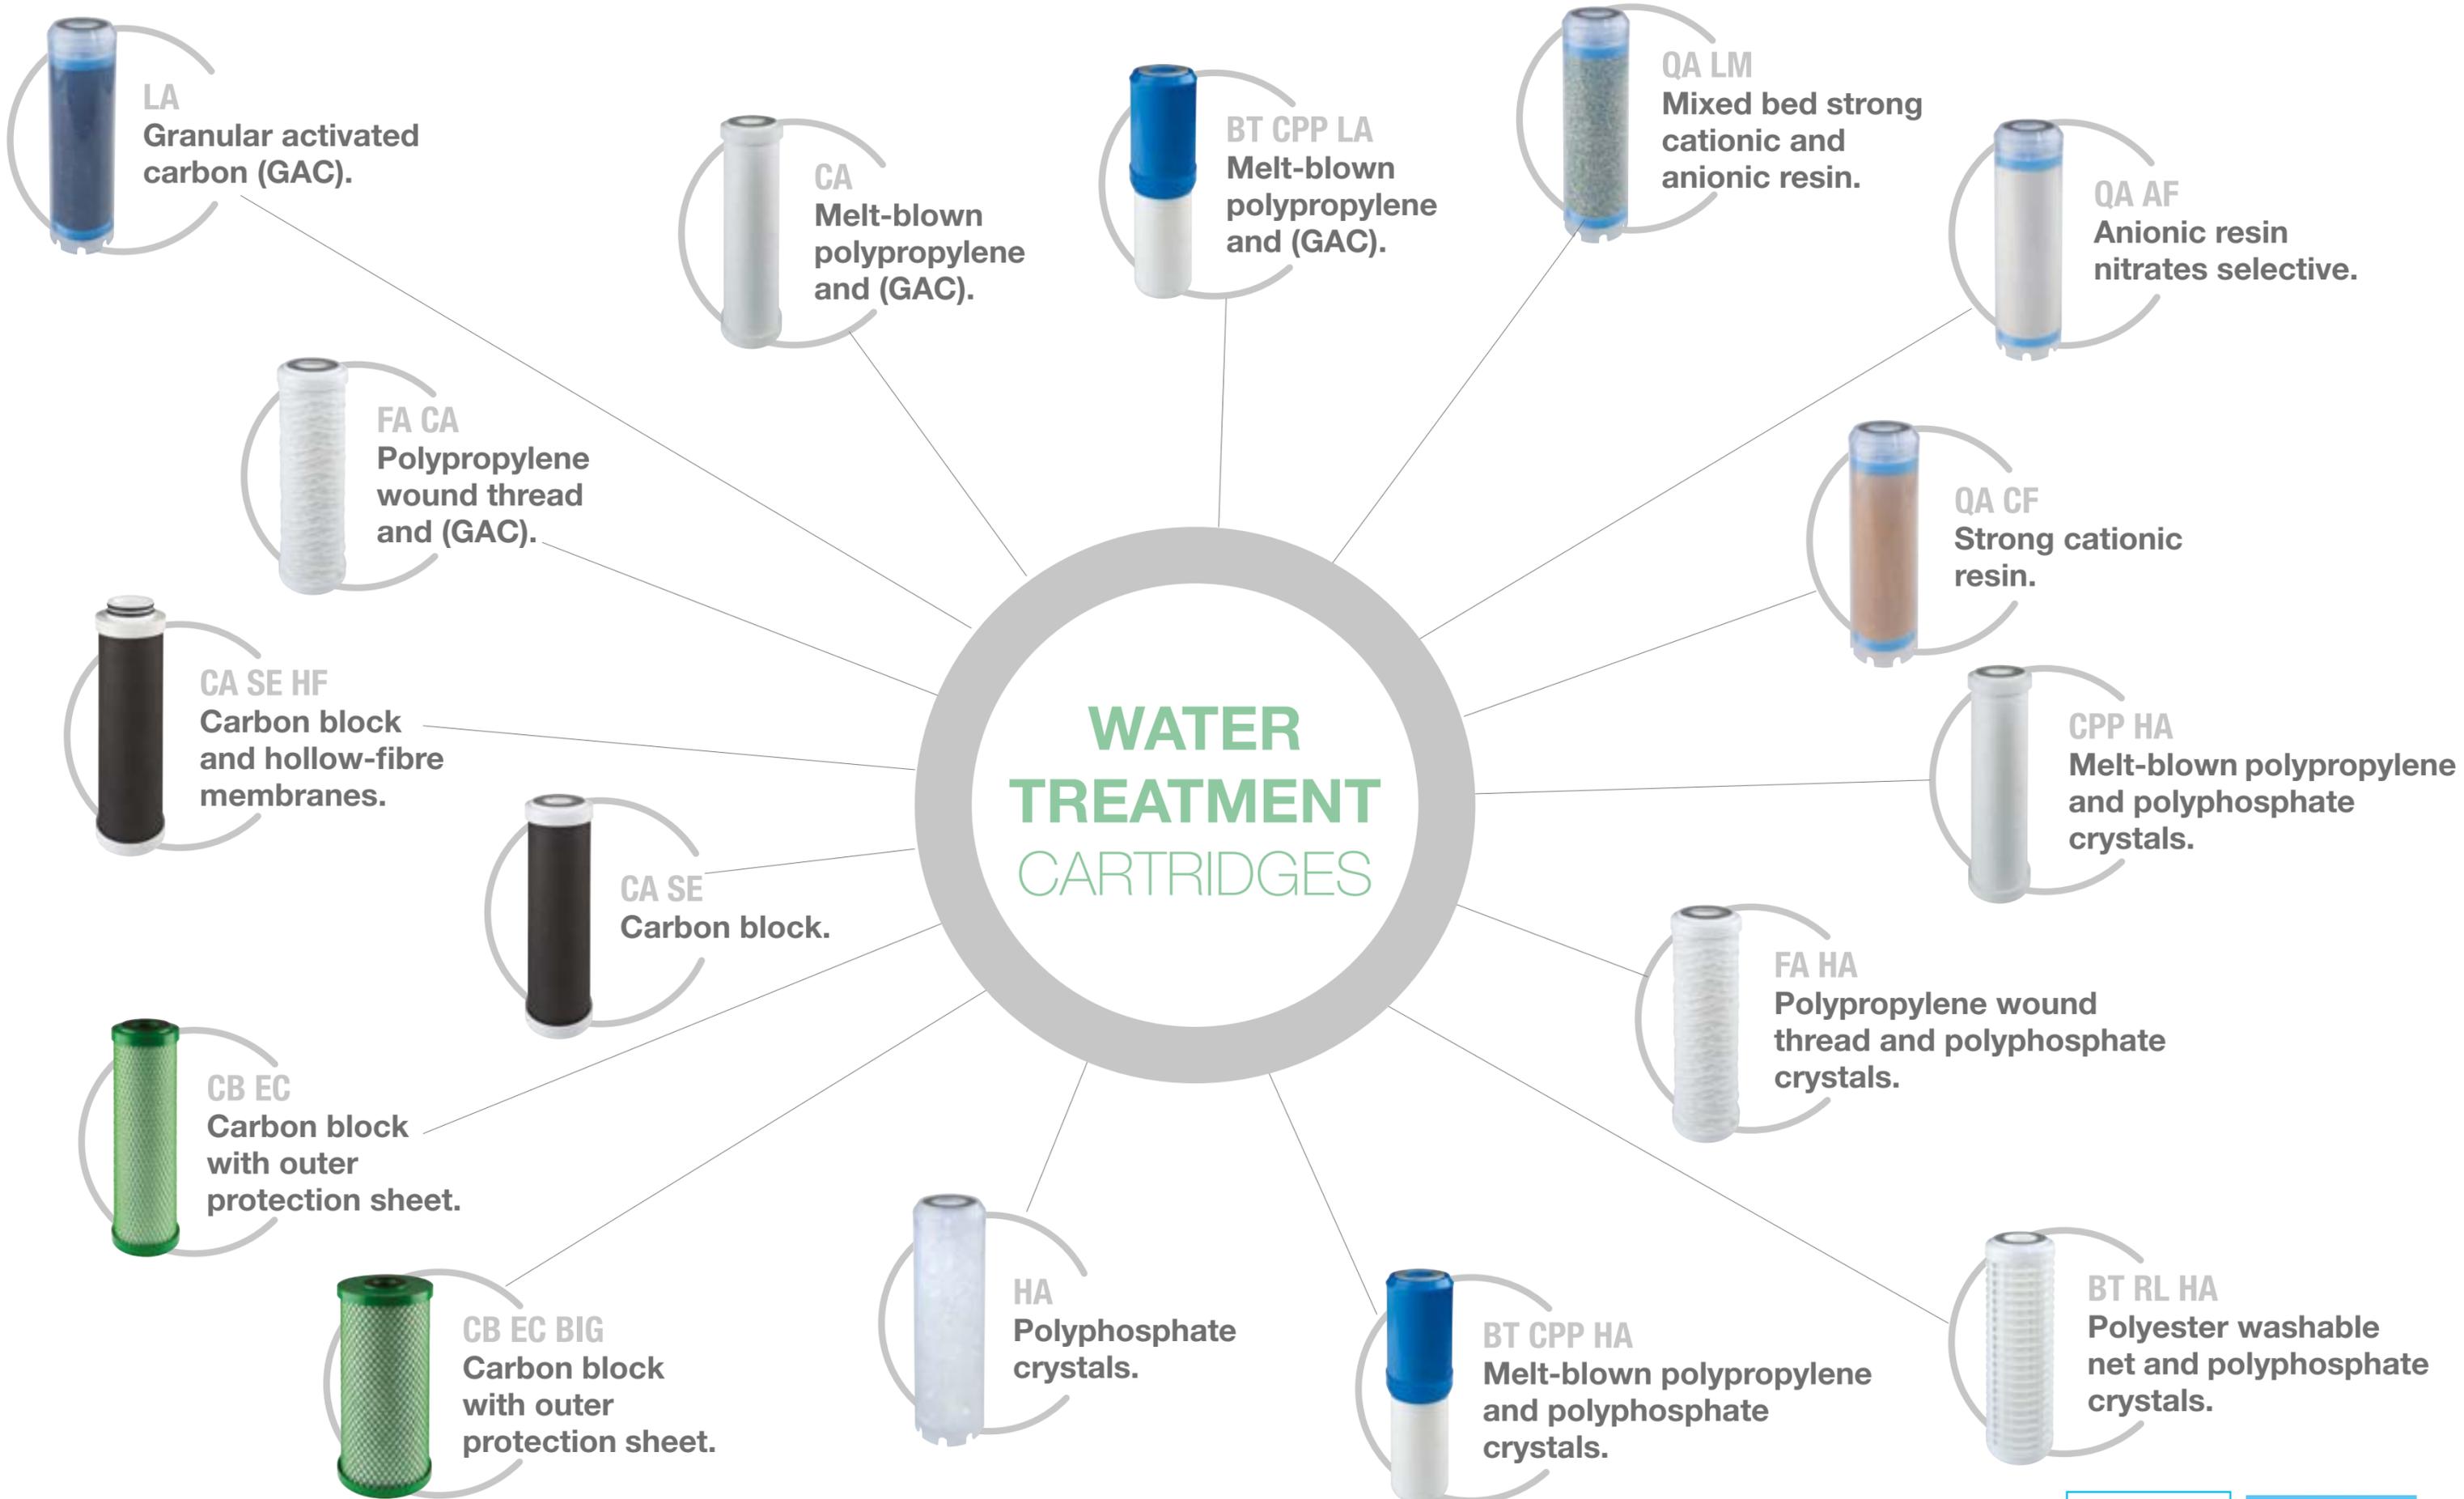

DP BIG
Housings designed to fit "BIG" filter cartridges with outer diameter (OD) 4.50".

DP DS
housings with 360° rotational connection group.
