

RJ MODELS

To Remember, And Go Ahead !

During the last 26 years of our passionate journey of Model Making, we seldom had much time to look back and re-collect the road that we walked.

A labor of love that we all pride in being part of.

The exciting process of turning concepts into reality, where we take part of making the impossible possible.

We paused and looked back and saw many stories and overcome challenges in many models that we made, a story of success, that can be best told with pictures that speak thousands of words.

As we look forward to the future, we put together this book for two reasons:

To tell you our success story, and for us to cherish the memory, as each picture inside has a great story behind, a passion that started 26 years ago from a humble all hands on team, to a dream chain of offices and a brand name realized across the world.

A passion shared by a few hundred members of our team, dedicated to continue making the impossible possible, by adding the third dimension on concepts, the one that words and pictures cannot portray.

A great leader has never been great without the support and dedication of a great team, a team that we are proud of.

These are the yesterday and today of this company. A proud team force fascinating craftsmanship, with a set bench mark that we always aim to break.
