

Longview's Fall '19 release embraces three connected finance trends that are driving change: cloud efficiency, UX and Automation

The Connected Finance solution for the finance office empowers its business users with new self-service capabilities, UI/UX enhancements and updates on automation

TORONTO | November 20, 2019 – Global software solution provider Longview is pleased to announce the general availability of its Longview Fall '19 release – intended as the next evolution of Connected Finance and focused on improving user experience and optimizing efficiency by lowering TCO (Total Cost of Ownership).

Longview Fall '19 highlights include:

- Improved user experience and data exploration options
- Dynamic grid aggregations (time-blending, attribute analysis, etc)
- Process map enhancements (publishing & launching options)
- Add-In for Office features for saving & sharing data queries
- Journal Entry and audit data drill through
- Multi-currency deferred tax netting & classification (Tax)
- New Analytics Self-Service capability

Wayne Stevens, Chief Product Officer at Longview comments: *“Organizations that are looking for a flexible, holistic and efficient solution for the office of the CFO can exploit our best-of-breed Connected Finance solution.”* He adds: *“By accelerating Close, Plan, Tax and Analytics functions, Longview’s offering definitely empowers organizations to maximize efficiency and performance.”*

Longview Fall '19 is available now – customers can visit the “What’s New” section of our customer portal to access a summary of the enhancements and to view the product Release Notes for full technical details of this release.
