

Solving the biggest problem in CRM: sales rep resistance.

Put off by the time-wasting inconvenience of CRMs, sales reps enter data partially, sporadically, and inaccurately. And they hate the systems for forcing them to do it. Garbage in, garbage out. RepDonkey is the CRM overlay that sales reps love. Increased user adoption means better data. It not only takes the hassle out of entering data – making for a truer, more accurate pipeline – it enables you to get way more from your data. And you can track real-time dealer activity through our secure customer portal where they have access to view quotes, pricing data, and invoice and order processing details.

Real-Time Analytics & Reporting

Customers, manufacturers and sales management can access up-to-the-minute stats and analytics, providing real-time accountability and transparency.

Simple Quote Generation

Generate, save and send amazing-looking custom-branded quotes in as few as three clicks (on web and mobile versions).

Pipeline Management

From simple quotes to historical and future pipeline, opportunity and sales order reports, RepDonkey will generate dashboards and export them as .CSV files.

Personalized Customer Interaction

RepDonkey drives traffic to your website by enabling customers to view quotes, pricing data, and access invoice and order processing information.

Create an Engagement

Easily create a customer engagement with details including customer information, date of engagement, location, days to close, and the probability of that close. Add products from multiple lines with allocated quantities, discounts, programs and totals. Save, preview and send the quote as an email and/or a PDF.

Pipeline Management

You now have the ability to "mass update" open opportunities. Going on PTO? Select a dozen and move them to next week. Get a purchase order? RepDonkey will locate open opportunities that match and close them out for you. All of this in seconds, not days or hours.
